SUBJECT INDEX

Absorbers

Optimal Design of Base-Isolated Structures with Dynamic Absorbers, S. C. Sinha and Guangning Li, EM Feb. 94, p221-231.

Accretion

Mechanics of Growing Deformable Solids: A Review, Vyacheslav E. Naumov, EM Feb. 94, p207-220.

Accuracy

Error Evaluation of Three Random-Field Generators, Gordon A. Fenton, EM Dec. 94, p2478-2497.

Active control

Frequency Domain Optimal Control Strategies for Aseismic Protection, B. F. Spencer, Jr., J. Suhardjo and M. K. Sain, EM Jan. 94, p135-158.

Modal Predictive Control of Structures. I: Formulation, F. López-Almansa, R. Andrade, J. Rodellar and A. M. Reinhorn, EM Aug. 94, p1743-1760.

Modal Predictive Control of Structures. II: Implementation, F. López-Almansa, R. Andrade, J. Rodellar and A. M. Reinhorn, EM Aug. 94, p1761-1772.

Optimal Configuration of Active-Control Mechanisms, Mohamed Abdel-Mooty and John Roorda, EM Mar. 94, p535-556.

Single-Degree-of-Freedom Nonlinear Homogeneous Systems, José A. Inaudi, George Leitmann and James M. Kelly, EM July 94, p1543-1562.

Stability of Active-Tendon Structural Control with Time Delay, L. Zhang, C. Y. Yang, M. J. Chajes and A. H-D. Cheng, EM May 93, p1017-1024.

Adaptive systems

Feasibility Study of Adaptive Control of Structures Under Seismic Excitation, R. A. Burdisso, L. E. Suarez and C. R. Fuller, EM Mar. 94, p580-592.

Aerodynamics

Bridge Buffeting by Skew Winds in Erection Stages, Robert H. Scanlan, EM Feb. 93, p251-269.

Identification of Aeroelastic Parameters of Flexible Bridges, Partha P. Sarkar, Nicholas P. Jones and Robert H. Scanlan, EM Aug. 94, p1718-1742.

Aeroelasticity

Identification of Aeroelastic Parameters of Flexible Bridges, Partha P. Sarkar, Nicholas P. Jones and Robert H. Scanlan, EM Aug. 94, p1718-1742.

Algorithms

Error Evaluation of Three Random-Field Generators, Gordon A. Fenton, EM Dec. 94, p2478-2497.

Alignment

Finite-Element Analysis of Elastoplastic Discontinuities, Paul Steinmann and Kaspar Willam, EM Nov. 94, p2428-2442.

Analysis

Buckling Mode Change of Antisymmetric Angle-Ply Laminates, Wen-Chi Chen, EM Mar. 94, p661-669.

Free-Vibration Analysis of Point-Supported Orthotropic Plates, D. J. Gorman, EM Jan. 94, p58-74.

Anisotropic materials

Stresses in Anisotropic Rock Mass with Irregular Topography, Ernian Pan and Bernard Amadei, EM Jan. 94, p97-119.

Anisotropy

Anisotropic Plasticity Model for Foams and Honeycombs, H. L. Schreyer, Q. H. Zuo and A. K. Maji, EM Sept. 94, p1913-1930.

Plane Orthotropic Layer by Transfer Matrix–Spline Boundary Element, L. Z. Jiang and J. S. Lee, EM May 94, p1026-1041.

Approximation methods

Approximate Random Vibration Analysis of Classically Damped MDOF Systems, C. Papadimitriou and J. L. Beck, EM Jan. 94, p75-96.

Buckling Solutions of Rectangular Mindlin Plates under Uniform Shear, C. M. Wang, Y. Xiang and S. Kitipornchai, EM Nov. 94, p2462-2470.

Point-Estimate Method for Calculating Statistical Moments, K. S. Li, EM July 92, p1506-1511.

Arches

Ground-Motion Spatial Variation Effects on Circular Arch Responses, Hong Hao, EM Nov. 94, p2326-2341.

Stability of Masonry Piers and Arches Including Sliding, Thomas E. Boothby, EM Feb. 94, p304-319.

Thin-Walled Curved Beams. II: Analytical Solutions for Buckling of Arches, Young J. Kang and Chai H. Yoo, EM Oct. 94, p2102-2125.

Asymmetry

Modified Eddy Viscosity Model in Fully Developed Asymmetric Channel Flows, Whey-Fone Tsai and Robert Ettema, EM Apr. 94, p720-732.

Axial forces

Dynamic Stability of Imperfect Frames Under Joint Displacements, D. S. Sophianopoulos and A. N. Kounadis, EM Aug. 94, p1661-1674.

Axial loads

Effect of Boundary Conditions on Buckling of Friction Piles, Mohammed A. Gabr, Jibai Wang and Sam A. Kiger, EM June 94, p1392-1400.

Lateral Postbuckling Analysis of Beam-Columns, A. N. Kounadis and G. I. Ioannidis, EM Apr. 94, p695-706.

Axisymmetry

Axisymmetric Plastic Plates with Ring Supports at Optimum Locations, C. M. Wang, S. K. Ting and W. A. M. Alwis, EM Feb. 94, p400-407.

Cone-Cylinder Intersection under Pressure: Axisymmetric Failure, Jin-Guang Teng, EM Sept. 94, p1896-1912.

Large Deformation Analysis of Plates on Unilateral Elastic Foundation, A. A. Khathlan, EM Aug. 94, p1820-1827.

Base isolation

Generalization of Optimal Control Theory: Linear and Nonlinear Control, J. N. Yang, Z. Li and S. Vongchavalitkul, EM Feb. 94, p266-283.

Optimal Design of Base-Isolated Structures with Dynamic Absorbers, S. C. Sinha and Guangning Li, EM Feb. 94, p221-231.

Bays

Characterization of Circulation and Salinity Change in Galveston Bay, Keh-Han Wang, EM Mar. 94, p557-579.

Beam columns

Lateral Postbuckling Analysis of Beam-Columns, A. N. Kounadis and G. I. Ioannidis, EM Apr. 94, p695-706.

Beams

Amplified Microbending in Coated Optical Fibres, John Roorda, EM Apr. 94, p917-921.

Comment on Global/Local Method for Low-Velocity Impact Problems, Minggang Zhou and William P. Schonberg, EM May 94, p1042-1056.

Comparison of Simple and Chebychev Polynomials in Rayleigh-Ritz Analysis, Sarvesh Singhvi and Rakesh K. Kapania, EM Oct. 94, p2126-2135.

Continuum Model for Analysis of Multiply Connected Perforated Cores, Domenico Capuani, Marco Savoia and Ferdinando Laudiero, EM Aug. 94, p1641-1660.

Equations for Tapered Thin-Walled Beams of Generic Open Section, Sundaramoorthy Rajasekaran, EM Aug. 94, p1607-1629.

Galerkin Sampling Method for Stochastic Mechanics Problems, P. D. Spanos and B. A. Zeldin, EM May 94, p1091-1106.

Instability of Tapered Thin-Walled Beams of Generic Section, Sundaramoorthy Rajasekaran, EM Aug. 94, p1630-1640.

Large Deflection of Beams under Moment Gradient, S. Chucheepsakul, S. Buncharoen and C. M. Wang, EM Sept. 94, p1848-1860.

Bearing capacity

Axisymmetric Plastic Plates with Ring Supports at Optimum Locations, C. M. Wang, S. K. Ting and W. A. M. Alwis, EM Feb. 94, p400-407.

Penetration Fracture of Ice Plate: 2D Analysis and Size Effect, Yuan-Neng Li and Zdeněk P. Bažant, EM July 94, p1481-1498.

Regularized Method in Limit Analysis, Gong-Liang Jiang, EM June 94, p1179-1197.

Bending

Amplified Microbending in Coated Optical Fibres, John Roorda, EM Apr. 94, p917-921.

Analytical Solution for Bending of Coaxial Orthotropic Cylinders, Claude Jolicoeur and Alain Cardou, EM Dec. 94, p2556-2574.

Bending of Cord Composite Plates, Carol Kittredge Shield and George A. Costello, EM Apr. 94, p876-892.

High-Order Bending of Sandwich Beams with Transversely Flexible Core and Nonparallel Skins, D. Peled and Y. Frostig, EM June 94, p1255-1269.

Rectangular Thick Plate with Free Edges on Pasternak Foundation, X. P. Shi, S. A. Tan and T. F. Fwa, EM May 94, p971-988.

Simple Semi-Loof Element for Analyzing Folded-Plate Structures, K. Y. Sze, EM Jan. 94, p120-134.

Stress and Displacement of Thick Doubly Curved Laminated Shells, Chih-Ping Wu and Chi-Chuan Liu, EM July 94, p1403-1428.

Bending moments

Load-Carrying Mechanism of Restrained Plates at Large Deflections, Zhiliang Fan, EM June 94, p1388-1391.

Thin-Walled Curved Beams. II: Analytical Solutions for Buckling of Arches, Young J. Kang and Chai H. Yoo, EM Oct. 94, p2102-2125.

Bifurcations

Finite-Element Analysis of Elastoplastic Discontinuities, Paul Steinmann and Kaspar Willam, EM Nov. 94, p2428-2442.

Lateral Postbuckling Analysis of Beam-Columns, A. N. Kounadis and G. I. Ioannidis, EM Apr. 94, p695-706.

Localization Analysis of Nonlocal Model Based on Crack Interactions, Milan Jirásek and Zdeněk P. Bažant, EM July 94, p1521-1542.

Nonlinear Finite Deformation Analysis of Beams and Columns, Ronald Y. S. Pak and Eric J. Stauffer, EM Oct. 94, p2136-2153.

Slender Rigid Block Motion, S. J. Hogan, EM Jan. 94, p11-24.

Blocks

Slender Rigid Block Motion, S. J. Hogan, EM Jan. 94, p11-24.

Bonding strength

Determination of Interfacial Debond Mode for Fiber-Reinforced Cementitious Composites, Victor C. Li and Yin-Wen Chan, EM Apr. 94, p707-719.

Pullout of Inclined Fibers from Cementitious Matrix, C. Ouyang, A. Pacios and S. P. Shah, EM Dec. 94, p2641-2659.

Boundaries

Axisymmetric Time-Domain Transmitting Boundaries, Andrew John Deeks and Mark Felton Randolph, EM Jan. 94, p25-42.

Boundary conditions

Buckling Mode Change of Antisymmetric Angle-Ply Laminates, Wen-Chi Chen, EM Mar. 94, p661-669.

Effect of Boundary Conditions on Buckling of Friction Piles, Mohammed A. Gabr, Jibai Wang and Sam A. Kiger, EM June 94, p1392-1400.

Boundary element method

Analysis of Embedded Foundations by Substructure-Deletion Method, R. Betti and A. M. Abdel-Ghaffar, EM June 94, p1283-1303.

Dynamic Green's Functions of Homogeneous Poroelastic Half-Plane, T. Senjuntichai and R. K. N. D. Rajapakse, EM Nov. 94, p2381-2404.

Large Deflection of Imperfect Plates by Iterative Be-Fe Method, Jianqiao Ye, EM Mar. 94, p431-444.

Plane Orthotropic Layer by Transfer Matrix–Spline Boundary Element, L. Z. Jiang and J. S. Lee, EM May 94, p1026-1041.

Water Waves Above Submerged Porous Plate, Xiping Yu and Allen T. Chwang, EM June 94, p1270-1282.

Boundary layer

Computation of Turbulent Shear Flow Over Surface-Mounted Obstacle, Jianming He and Charles C. S. Song, EM Nov. 92, p2282-2297.

Bounding surface

Unified Critical-State Bounding-Surface Plasticity Model for Soil, Roger S. Crouch, John P. Wolf and Yannis F. Dafalias, EM Nov. 94, p2251-2270.

Bracing

Cross Bracings in Tapered Systems: Semirigid Ends, Robert Levy, Fred Segal and Avigdor Rutenberg, EM Aug. 94, p1803-1818.

Design of Imperfect Cross-Bracings, Fred Segal, Robert Levy and Avigdor Rutenberg, EM May 94, p1057-1075.

Breakwaters

Wave Motion Through Porous Structures, Xiping Yu and Allen T. Chwang, EM May 94, p989-1008.

Bridge construction

Bridge Buffeting by Skew Winds in Erection Stages, Robert H. Scanlan, EM Feb. 93, p251-269.

Bridge decks

Bridge Buffeting by Skew Winds in Erection Stages, Robert H. Scanlan, EM Feb. 93, p251-269.

Bridge loads

Stochastic Vehicle-Queue-Load Model for Large Bridges, Ove Ditlevsen and Henrik O. Madsen, EM Sept. 94, p1829-1847.

Traffic Loads on Large Bridges Modeled as White-Noise Fields, Ove Ditlevsen, EM Apr. 94, p681-694.

Bridges

Identification of Aeroelastic Parameters of Flexible Bridges, Partha P. Sarkar, Nicholas P. Jones and Robert H. Scanlan, EM Aug. 94, p1718-1742.

Random Vibration of Beam under Moving Loads, Giuseppe Ricciardi, EM Nov. 94, p2361-2380.

Stochastic Vehicle-Queue-Load Model for Large Bridges, Ove Ditlevsen and Henrik O. Madsen, EM Sept. 94, p1829-1847.

Bridges, cable-stayed

Identification of Aeroelastic Parameters of Flexible Bridges, Partha P. Sarkar, Nicholas P. Jones and Robert H. Scanlan, EM Aug. 94, p1718-1742.

Bridges, spans

Traffic Loads on Large Bridges Modeled as White-Noise Fields, Ove Ditlevsen, EM Apr. 94, p681-694.

Brittleness

Constitutive Theory of Interface Behavior in Quasi-Brittle Materials, H. Y. Yang and Ming L. Wang, EM Dec. 94, p2588-2603.

Buckling

Buckle Propagation: Steady-State Finite-Element Analysis, André C. Nogueira and John L. Tassoulas, EM Sept. 94, p1931-1944.

Buckling Mode Change of Antisymmetric Angle-Ply Laminates, Wen-Chi Chen, EM Mar. 94, p661-669.

Buckling of Plates with Stiffening Elastically-Restrained Edges, Raymond H. Plaut and Ardéshir Guran, EM Feb. 94, p408-411.

Buckling Solutions of Rectangular Mindlin Plates under Uniform Shear, C. M. Wang, Y. Xiang and S. Kitipornchai, EM Nov. 94, p2462-2470.

Comparison of Simple and Chebychev Polynomials in Rayleigh-Ritz Analysis, Sarvesh Singhvi and Rakesh K. Kapania, EM Oct. 94, p2126-2135.

Cross Bracings in Tapered Systems: Semirigid Ends, Robert Levy, Fred Segal and Avigdor Rutenberg, EM Aug. 94, p1803-1818.

Design of Imperfect Cross-Bracings, Fred Segal, Robert Levy and Avigdor Rutenberg, EM May 94, p1057-1075.

Effect of Boundary Conditions on Buckling of Friction Piles, Mohammed A. Gabr, Jibai Wang and Sam A. Kiger, EM June 94, p1392-1400.

Equations for Tapered Thin-Walled Beams of Generic Open Section, Sundaramoorthy Rajasekaran, EM Aug. 94, p1607-1629.

Instability of Tapered Thin-Walled Beams of Generic Section, Sundaramoorthy Rajasekaran, EM Aug. 94, p1630-1640.

Local Buckling by Complex Finite Strip Method Using Bubble Functions, Mojtaba Azhari and Mark Andrew Bradford, EM Jan. 94, p43-57.

Lower Bounds for Overall Buckling of Spherical Space Domes, M. Kashani and J. G. A. Croll, EM May 94, p949-970.

Nonlinear Finite Deformation Analysis of Beams and Columns, Ronald Y. S. Pak and Eric J. Stauffer, EM Oct. 94, p2136-2153.

Out-of-Plane Buckling of Restrained Thin Rings of General Open Section, J. G. Teng and R. M. Lucas, EM May 94, p929-948.

Stability of Skew Mindlin Plates under Isotropic In-Plane Pressure, C. M. Wang, S. Kitipornchai, Y. Xiang and K. M. Liew, EM Feb. 93, p393-401.

Thin-Walled Curved Beams. I: Formulation of Nonlinear Equations, Young J. Kang and Chai H. Yoo, EM Oct. 94, p2072-2101.

Thin-Walled Curved Beams. II: Analytical Solutions for Buckling of Arches, Young J. Kang and Chai H. Yoo, EM Oct. 94, p2102-2125.

Three-Dimensional Solutions for Initially Stressed Structural Sandwiches, Ahmed K. Noor, Jeanne M. Peters and W. Scott Burton, EM Feb. 94, p284-303.

Buffeting

Bridge Buffeting by Skew Winds in Erection Stages, Robert H. Scanlan, EM Feb. 93, p251-269.

Cables

Dynamic Behavior of Nonlinear Cable System. III, Dan M. Ghiocel and Dario A. Gasparini, EM Dec. 94, p2694-2712.

Dynamics of Elastic Cable Under Parametric and External Resonances, Y. Cai and S. S. Chen, EM Aug. 94, p1786-1802.

Poisson Effect in Extensive Cables with Both Ends Fixed, John V. Huddleston and Hee-Jung Ham, EM July 94, p1590-1595.

Cavities

Three-Dimensional Dynamic Response of Twin Cavities due to Traveling Loads, F. Guan and I. D. Moore, EM Mar. 94, p637-651.

Cements

Determination of Interfacial Debond Mode for Fiber-Reinforced Cementitious Composites, Victor C. Li and Yin-Wen Chan, EM Apr. 94, p707-719.

New Formulation for Elastic Modulus of Fiber-Reinforced, Quasibrittle Matrices, Jamil M. Alwan and Antoine E. Naaman, EM Nov. 94, p2443-2460.

Channel design

No-Choke Flow in Trapezoidal Channels, Subhasish Dey, EM Oct. 94, p2224-2231.

Channel flow

Modified Eddy Viscosity Model in Fully Developed Asymmetric Channel Flows, Whey-Fone Tsai and Robert Ettema, EM Apr. 94, p720-732.

Chaos

Slender Rigid Block Motion, S. J. Hogan, EM Jan. 94, p11-24.

Circulation

Characterization of Circulation and Salinity Change in Galveston Bay, Keh-Han Wang, EM Mar. 94, p557-579.

Cisterns

Spectral Analysis of Fluid Flow in Oscillating Grid Reactor, Leonard W. Casson, Desmond F. Lawler and David G. Bogard, EM Feb. 94, p346-367.

Closed form solutions

Analytical Solutions for Harmonic Wave Propagation in Poroelastic Media, Chris Zimmerman and M. Stern, EM Oct. 94, p2154-2178.

Discretization Influence on Regularization by Two Localization Limiters, Antonio Huerta and Gilles Pijaudier-Cabot, EM June 94, p1198-1218.

Hollow Spheres Subjected to Sustained and Variable Loads, Wei Jiang, EM June 94, p1343-1368.

Out-of-Plane Buckling of Restrained Thin Rings of General Open Section, J. G. Teng and R. M. Lucas, EM May 94, p929-948.

Coating

Amplified Microbending in Coated Optical Fibres, John Roorda, EM Apr. 94, p917-921.

Cohesion

Stability Theory of Cohesive Crack Model, Yuan N. Li and Robert Y. Liang, EM Mar. 92, p587-603.

Cohesionless soils

Procedures for Elastoplastic Liquefaction Modeling of Sands, A. Anandarajah, EM July 94, p1563-1587.

Composite beams

Composite Beam Element with Layerwise Plane Sections, Youngchan Kim, Julio F. Davalos and Ever J. Barbero, EM May 94, p1160-1166.

Composite materials

Bending of Cord Composite Plates, Carol Kittredge Shield and George A. Costello, EM Apr. 94, p876-892.

Determination of Interfacial Debond Mode for Fiber-Reinforced Cementitious Composites, Victor C. Li and Yin-Wen Chan, EM Apr. 94, p707-719.

Free Vibrations of Laminated Anisotropic Cylindrical Shells, P. R. Heyliger and A. Jilani, EM May 93, p1062-1077.

New Formulation for Elastic Modulus of Fiber-Reinforced, Quasibrittle Matrices, Jamil M. Alwan and Antoine E. Naaman, EM Nov. 94, p2443-2460.

Stress and Displacement of Thick Doubly Curved Laminated Shells, Chih-Ping Wu and Chi-Chuan Liu, EM July 94, p1403-1428.

Composite structures

Nonlinear Geometric and Material Behavior of Shell Structures with Large Strains, S. A. Schimmels and A. N. Palazotto, EM Feb. 94, p320-345.

Compression

Material Model for Concrete in Cracked and Uncracked States, R. Meyer, H. Ahrens and H. Duddeck, EM Sept. 94, p1877-1895.

Concrete

Finite-Element Modeling of Deformation and Cracking in Early-Age Concrete, René de Borst and A. H. van den Boogaard, EM Dec. 94, p2519-2534.

Fractals, Fractures, and Size Effects in Concrete, Victor E. Saouma and Christopher C. Barton, EM Apr. 94, p835-854.

Fracture Energy Formulation for Inelastic Behavior of Plain Concrete, G. Etse and K. Willam, EM Sept. 94, p1983-2011.

Material Model for Concrete in Cracked and Uncracked States, R. Meyer, H. Ahrens and H. Duddeck, EM Sept. 94, p1877-1895.

Moisture and Heat Flow in Concrete Walls Exposed to Fire, Jana Selih, Antonio C. M. Sousa and Theodore W. Bremner, EM Oct. 94, p2028-2043.

Scaling Laws in Mechanics of Failure, Zdeněk P. Bažant, EM Sept. 93, p1828-1844.

Two New Methods of Fictitious-Crack Model and Their Applications, Yuan N. Li, Michael Müller and J.-D. Wörner, EM Dec. 94, p2604-2620.

Concrete, reinforced

Postcracking Formulation for Analysis of RC Structures Based on Secant Stiffness, Ananth Ramaswamy, F. Barzegar and G. Z. Voyiadjis, EM Dec. 94, p2621-2640.

Pullout of Inclined Fibers from Cementitious Matrix, C. Ouyang, A. Pacios and S. P. Shah, EM Dec. 94, p2641-2659.

Concrete structures

Experimental Study of Embedded Fiber-Optic Strain Gauges in Concrete Structures, S. F. Masri, M. S. Agbabian, A. M. Abdel-Ghaffar, M. Higazy, R. O. Claus and M. J. de Vries, EM Aug. 94, p1696-1717.

Conditional probability

Conditioned Stochastic Processes for Conditional Random Fields, Hiroyuki Kameda and Hitoshi Morikawa, EM Apr. 94, p855-875.

Conformal mapping

Stresses in Anisotropic Rock Mass with Irregular Topography, Ernian Pan and Bernard Amadei, EM Jan. 94, p97-119.

Conical bodies

Cone-Cylinder Intersection under Pressure: Axisymmetric Failure, Jin-Guang Teng, EM Sept. 94, p1896-1912.

Constitutive equations

Fracture Energy Formulation for Inelastic Behavior of Plain Concrete, G. Etse and K. Willam, EM Sept. 94, p1983-2011.

Wave Attenuation in Elastic Continuum with Attenuating Neighborhood, Songtao Xue, Jun Tobita and Masanori Izumi, EM Mar. 94, p419-430.

Constitutive models

Constitutive Theory of Interface Behavior in Quasi-Brittle Materials, H. Y. Yang and Ming L. Wang, EM Dec. 94, p2588-2603.

Finite-Element Simulation of Ice-Sheet Indentation, H. A. Khoo and T. M. Hrudey, EM June 94, p1322-1342.

Postcracking Formulation for Analysis of RC Structures Based on Secant Stiffness, Ananth Ramaswamy, F. Barzegar and G. Z. Voyiadjis, EM Dec. 94, p2621-2640.

Unified Critical-State Bounding-Surface Plasticity Model for Soil, Roger S. Crouch, John P. Wolf and Yannis F. Dafalias, EM Nov. 94, p2251-2270.

Constraints

Stability of Masonry Piers and Arches Including Sliding, Thomas E. Boothby, EM Feb. 94, p304-319.

Vibration of Mindlin Plates on Point Supports Using Constraint Functions, K. M. Liew, Y. Xiang, S. Kitipornchai and M. K. Lim, EM Mar. 94, p499-513.

Continuous beams

Continuum Model for Analysis of Multiply Connected Perforated Cores, Domenico Capuani, Marco Savoia and Ferdinando Laudiero, EM Aug. 94, p1641-1660.

Continuum mechanics

Discretization Influence on Regularization by Two Localization Limiters, Antonio Huerta and Gilles Pijaudier-Cabot, EM June 94, p1198-1218.

Localization Analysis of Nonlocal Model Based on Crack Interactions, Milan Jirásek and Zdeněk P. Bažant, EM July 94, p1521-1542.

Nonlocal Damage Theory Based on Micromechanics of Crack Interactions, Zdeněk P. Bažant, EM Mar. 94, p593-617.

Probabilistic Nonlocal Damage Model for Continua with Random Field Properties, J. Carmeliet and H. Hens, EM Oct. 94, p2013-2027.

Wave Attenuation in Elastic Continuum with Attenuating Neighborhood, Songtao Xue, Jun Tobita and Masanori Izumi, EM Mar. 94, p419-430.

Control systems

Control of Hysteretic System Using Velocity and Acceleration Feedbacks, J. N. Yang, Z. Li and S. C. Liu, EM Nov. 92, p2227-2245.

Feasibility Study of Adaptive Control of Structures Under Seismic Excitation, R. A. Burdisso, L. E. Suarez and C. R. Fuller, EM Mar. 94, p580-592.

Generalization of Optimal Control Theory: Linear and Nonlinear Control, J. N. Yang, Z. Li and S. Vongchavalitkul, EM Feb. 94, p266-283.

Core

Continuum Model for Analysis of Multiply Connected Perforated Cores, Domenico Capuani, Marco Savoia and Ferdinando Laudiero, EM Aug. 94, p1641-1660.

High-Order Bending of Sandwich Beams with Transversely Flexible Core and Nonparallel Skins, D. Peled and Y. Frostig, EM June 94, p1255-1269.

Crack propagation

Effects of Process Zones on Crack Interactions, K. R. Shah, J. F. Labuz and H. K. Stolarski, EM Dec. 94, p2678-2693.

Fatigue Crack Growth Rate of Metal by Plastic Energy Damage Accumulation Theory, Wei Wang and Cheng-Tzu Thomas Hsu, EM Apr. 94, p776-795.

Stability Theory of Cohesive Crack Model, Yuan N. Li and Robert Y. Liang, EM Mar. 92, p587-603.

Cracking

Finite-Element Modeling of Deformation and Cracking in Early-Age Concrete, René de Borst and A. H. van den Boogaard, EM Dec. 94, p2519-2534.

Penetration Fracture of Ice Plate: 2D Analysis and Size Effect, Yuan-Neng Li and Zdeněk P. Bažant, EM July 94, p1481-1498.

Cracks

Dynamic Stress Intensity Factor for Subsurface Inclined Cracks, Chien-Ching Ma and Szu-Kuzi Chen, EM Mar. 94, p483-498.

Effects of Process Zones on Crack Interactions, K. R. Shah, J. F. Labuz and H. K. Stolarski, EM Dec. 94, p2678-2693.

Localization Analysis of Nonlocal Model Based on Crack Interactions, Milan Jirásek and Zdeněk P. Bažant, EM July 94, p1521-1542.

Nonlocal Damage Theory Based on Micromechanics of Crack Interactions, Zdeněk P. Bažant, EM Mar. 94, p593-617.

Peak Load Determination in Linear Fictitious Crack Model, Yuan N. Li and Robert Y. Liang, EM Feb. 94, p232-249.

Two New Methods of Fictitious-Crack Model and Their Applications, Yuan N. Li, Michael Müller and J.-D. Wörner, EM Dec. 94, p2604-2620.

Creep

Finite-Element Modeling of Deformation and Cracking in Early-Age Concrete, René de Borst and A. H. van den Boogaard, EM Dec. 94, p2519-2534.

Finite-Element Simulation of Ice-Sheet Indentation, H. A. Khoo and T. M. Hrudey, EM June 94, p1322-1342.

Critical load

Buckling Mode Change of Antisymmetric Angle-Ply Laminates, Wen-Chi Chen, EM Mar. 94, p661-669.

Cross sections

Out-of-Plane Buckling of Restrained Thin Rings of General Open Section, J. G. Teng and R. M. Lucas, EM May 94, p929-948.

Curvature

Amplified Microbending in Coated Optical Fibres, John Roorda, EM Apr. 94, p917-921.

Effect of Initial Curvature on Natural Frequency of Thin Plate on Hinge Supports, Qiulin Yu, Naser Mostaghel and Kuan-Chen Fu, EM Apr. 94, p796-813.

Thin-Walled Curved Beams. I: Formulation of Nonlinear Equations, Young J. Kang and Chai H. Yoo, EM Oct. 94, p2072-2101.

Thin-Walled Curved Beams. II: Analytical Solutions for Buckling of Arches, Young J. Kang and Chai H. Yoo, EM Oct. 94, p2102-2125.

Curved beams

Nonlinear Finite Deformation Analysis of Beams and Columns, Ronald Y. S. Pak and Eric J. Stauffer, EM Oct. 94, p2136-2153.

Thin-Walled Curved Beams. I: Formulation of Nonlinear Equations, Young J. Kang and Chai H. Yoo, EM Oct. 94, p2072-2101.

Thin-Walled Curved Beams. II: Analytical Solutions for Buckling of Arches, Young J. Kang and Chai H. Yoo, EM Oct. 94, p2102-2125.

Cyclic loads

Lateral Cyclic Response of Pile in ViscoElastic Winkler Subgrade, Shintaro Yao and Toyoaki Nogami, EM Apr. 94, p758-775.

Procedures for Elastoplastic Liquefaction Modeling of Sands, A. Anandarajah, EM July 94, p1563-1587.

Shakedown Analysis of Hollow Spheres, Wei Jiang, EM July 94, p1447-1480.

Study of Two-Surface Plasticity Theory, Wei Jiang, EM Oct. 94, p2179-2200.

Cylinders

Analytical Solution for Bending of Coaxial Orthotropic Cylinders, Claude Jolicoeur and Alain Cardou, EM Dec. 94, p2556-2574.

Cone-Cylinder Intersection under Pressure: Axisymmetric Failure, Jin-Guang Teng, EM Sept. 94, p1896-1912.

Cylindrical shells

Buckle Propagation: Steady-State Finite-Element Analysis, André C. Nogueira and John L. Tassoulas, EM Sept. 94, p1931-1944.

Free Vibrations of Laminated Anisotropic Cylindrical Shells, P. R. Heyliger and A. Jilani, EM May 93, p1062-1077.

Three-Dimensional Solutions for Thermomechanical Stresses in Sandwich Panels and Shells, W. Scott Burton and Ahmed K. Noor, EM Oct. 94, p2044-2071.

Damage

Localization Analysis of Nonlocal Model Based on Crack Interactions, Milan Jirásek and Zdeněk P. Bažant, EM July 94, p1521-1542.

Probabilistic Nonlocal Damage Model for Continua with Random Field Properties, J. Carmeliet and H. Hens, EM Oct. 94, p2013-2027.

Damage accumulation

Fatigue Crack Growth Rate of Metal by Plastic Energy Damage Accumulation Theory, Wei Wang and Cheng-Tzu Thomas Hsu, EM Apr. 94, p776-795.

Damage assessment

Application of Neural Networks in Vibrational Signature Analysis, M. F. Elkordy, K. C. Chang and G. C. Lee, EM Feb. 94, p250-265.

Damping

Approximate Random Vibration Analysis of Classically Damped MDOF Systems, C. Papadimitriou and J. L. Beck, EM Jan. 94, p75-96.

Single-Degree-of-Freedom Nonlinear Homogeneous Systems, José A. Inaudi, George Leitmann and James M. Kelly, EM July 94, p1543-1562.

Deflection

Large Deflection of Beams under Moment Gradient, S. Chucheepsakul, S. Buncharoen and C. M. Wang, EM Sept. 94, p1848-1860.

Large Deflection of Imperfect Plates by Iterative Be-Fe Method, Jianqiao Ye, EM Mar. 94, p431-444.

Load-Carrying Mechanism of Restrained Plates at Large Deflections, Zhiliang Fan, EM June 94, p1388-1391.

Deformation

Mechanics of Growing Deformable Solids: A Review, Vyacheslav E. Naumov, EM Feb. 94, p207-220.

Nonlinear Finite Deformation Analysis of Beams and Columns, Ronald Y. S. Pak and Eric J. Stauffer, EM Oct. 94, p2136-2153.

Shakedown Analysis of Hollow Spheres, Wei Jiang, EM July 94, p1447-1480.

Structural System Changes by Means of Forcedly Applied Restraints, Angelo Marcello Tarantino, EM Feb. 94, p392-399.

Deformation analysis

Large Deformation Analysis of Plates on Unilateral Elastic Foundation, A. A. Khathlan, EM Aug. 94, p1820-1827.

Degrees of freedom

Energy Method for Nonlinear Random Vibrations in MDF Systems, Long Yun Jia, EM Apr. 94, p910-916.

Energy-Based Dynamic Analysis of Secondary Systems, Genda Chen and T. T. Soong, EM Mar. 94, p514-534.

Design criteria

Lower Bounds for Overall Buckling of Spherical Space Domes, M. Kashani and J. G. A. Croll, EM May 94, p949-970.

Differential equations

Free-Vibration Analysis of Tank Containing Two Liquids, Yu Tang, EM Mar. 94, p618-636.

Large Deflection of Beams under Moment Gradient, S. Chucheepsakul, S. Buncharoen and C. M. Wang, EM Sept. 94, p1848-1860.

Responses of Dynamic Systems Excited by Non-Gaussian Pulse Processes, Sau-Lon James Hu, EM Sept. 93, p1818-1827.

Stability of Active-Tendon Structural Control with Time Delay, L. Zhang, C. Y. Yang, M. J. Chajes and A. H-D. Cheng, EM May 93, p1017-1024.

Discontinuities

Finite-Element Analysis of Elastoplastic Discontinuities, Paul Steinmann and Kaspar Willam, EM Nov. 94, p2428-2442.

Discrete elements

Discretization Influence on Regularization by Two Localization Limiters, Antonio Huerta and Gilles Pijaudier-Cabot, EM June 94, p1198-1218.

Displacement

Dynamic Stability of Imperfect Frames Under Joint Displacements, D. S. Sophianopoulos and A. N. Kounadis, EM Aug. 94, p1661-1674.

Stress and Displacement of Thick Doubly Curved Laminated Shells, Chih-Ping Wu and Chi-Chuan Liu, EM July 94, p1403-1428.

Thin-Walled Curved Beams. I: Formulation of Nonlinear Equations, Young J. Kang and Chai H. Yoo, EM Oct. 94, p2072-2101.

Thin-Walled Curved Beams. II: Analytical Solutions for Buckling of Arches, Young J. Kang and Chai H. Yoo, EM Oct. 94, p2102-2125.

Displacements

hp Version of Finite-Element Mixed Method, Michelle M. Crull and P. K. Basu, EM Nov. 94, p2342-2360.

Dissipation

Water Waves Above Submerged Porous Plate, Xiping Yu and Allen T. Chwang, EM June 94, p1270-1282.

Wave Motion Through Porous Structures, Xiping Yu and Allen T. Chwang, EM May 94, p989-1008.

Domes, structural

Lower Bounds for Overall Buckling of Spherical Space Domes, M. Kashani and J. G. A. Croll, EM May 94, p949-970.

Doppler systems

Spectral Analysis of Fluid Flow in Oscillating Grid Reactor, Leonard W. Casson, Desmond F. Lawler and David G. Bogard, EM Feb. 94, p346-367.

Dynamic analysis

Analysis of Embedded Foundations by Substructure-Deletion Method, R. Betti and A. M. Abdel-Ghaffar, EM June 94, p1283-1303.

Energy-Based Dynamic Analysis of Secondary Systems, Genda Chen and T. T. Soong, EM Mar. 94, p514-534.

Dynamic loads

Three-Dimensional Dynamic Response of Twin Cavities due to Traveling Loads, F. Guan and I. D. Moore, EM Mar. 94, p637-651.

Dynamic response

Comment on Global/Local Method for Low-Velocity Impact Problems, Minggang Zhou and William P. Schonberg, EM May 94, p1042-1056.

Dynamic Green's Functions of Homogeneous Poroelastic Half-Plane, T. Senjuntichai and R. K. N. D. Rajapakse, EM Nov. 94, p2381-2404.

Dynamic Modal Responses of Wave-Excited Offshore Structures, G. D. Hahn and J. R. Sanghvi, EM Apr. 94, p893-908.

Dynamic Response of Tank Containing Two Liquids, Yu Tang, EM Mar. 93, p531-548.

Free-Vibration Analysis of Tank Containing Two Liquids, Yu Tang, EM Mar. 94, p618-636.

Importance of Speed and Frequency in Flexible Pavement Response, M. S. A. Hardy and D. Cebon, EM Mar. 94, p463-482.

Random Vibration of Beam under Moving Loads, Giuseppe Ricciardi, EM Nov. 94, p2361-2380.

Responses of Dynamic Systems Excited by Non-Gaussian Pulse Processes, Sau-Lon James Hu, EM Sept. 93, p1818-1827.

Three-Dimensional Dynamic Response of Twin Cavities due to Traveling Loads, F. Guan and I. D. Moore, EM Mar. 94, p637-651.

Dynamic stability

Dynamic Stability of Imperfect Frames Under Joint Displacements, D. S. Sophianopoulos and A. N. Kounadis, EM Aug. 94, p1661-1674.

Dynamics

Dynamic Behavior of Nonlinear Cable System. III, Dan M. Ghiocel and Dario A. Gasparini, EM Dec. 94, p2694-2712.

Dynamics of Elastic Cable Under Parametric and External Resonances, Y. Cai and S. S. Chen, EM Aug. 94, p1786-1802.

Effect of Initial Curvature on Natural Frequency of Thin Plate on Hinge Supports, Qiulin Yu, Naser Mostaghel and Kuan-Chen Fu, EM Apr. 94, p796-813.

Equations for Tapered Thin-Walled Beams of Generic Open Section, Sundaramoorthy Rajasekaran, EM Aug. 94, p1607-1629.

Generalization of Optimal Control Theory: Linear and Nonlinear Control, J. N. Yang, Z. Li and S. Vongchavalitkul, EM Feb. 94, p266-283.

Instability of Tapered Thin-Walled Beams of Generic Section, Sundaramoorthy Rajasekaran, EM Aug. 94, p1630-1640.

Methodology for Optimum Sensor Locations for Parameter Identification in Dynamic Systems, Firdaus E. Udwadia, EM Feb. 94, p368-390.

Simulation of Multi-Dimensional, Anisotropic Ground Motions, O. Ramadan and M. Novak, EM Aug. 94, p1773-1785.

Earthquake excitation

Feasibility Study of Adaptive Control of Structures Under Seismic Excitation, R. A. Burdisso, L. E. Suarez and C. R. Fuller, EM Mar. 94, p580-592.

Frequency Domain Optimal Control Strategies for Aseismic Protection, B. F. Spencer, Jr., J. Suhardjo and M. K. Sain, EM Jan. 94, p135-158.

Earthquake resistant structures

Control of Hysteretic System Using Velocity and Acceleration Feedbacks, J. N. Yang, Z. Li and S. C. Liu, EM Nov. 92, p2227-2245.

Generalization of Optimal Control Theory: Linear and Nonlinear Control, J. N. Yang, Z. Li and S. Vongchavalitkul, EM Feb. 94, p266-283.

Optimal Design of Base-Isolated Structures with Dynamic Absorbers, S. C. Sinha and Guangning Li, EM Feb. 94, p221-231.

Earthquakes

Analysis of Free Vibrations of Tall Buildings, Qiusheng Li, Hong Cao and Guiqing Li, EM Sept. 94, p1861-1876.

Conditioned Stochastic Processes for Conditional Random Fields, Hiroyuki Kameda and Hitoshi Morikawa, EM Apr. 94, p855-875.

Dynamic Response of Tank Containing Two Liquids, Yu Tang, EM Mar. 93, p531-548.

Ground-Motion Spatial Variation Effects on Circular Arch Responses, Hong Hao, EM Nov. 94, p2326-2341.

Nonlinear Model for Building-Soil Systems, D. B. McCallen and K. M. Romstad, EM May 94, p1129-1152.

Seismic Random-Vibration Analysis of Multisupport-Structural Systems, Ernesto Heredia-Zavoni and Erik H. Vanmarcke, EM May 94, p1107-1128.

Simulation of Multi-Dimensional, Anisotropic Ground Motions, O. Ramadan and M. Novak, EM Aug. 94, p1773-1785.

Slender Rigid Block Motion, S. J. Hogan, EM Jan. 94, p11-24.

Eccentric loading

Design of Imperfect Cross-Bracings, Fred Segal, Robert Levy and Avigdor Rutenberg, EM May 94, p1057-1075.

Eddy viscosity

Modified Eddy Viscosity Model in Fully Developed Asymmetric Channel Flows, Whey-Fone Tsai and Robert Ettema, EM Apr. 94, p720-732.

Effective length

Cross Bracings in Tapered Systems: Semirigid Ends, Robert Levy, Fred Segal and Avigdor Rutenberg, EM Aug. 94, p1803-1818.

Effective stress

Procedures for Elastoplastic Liquefaction Modeling of Sands, A. Anandarajah, EM July 94, p1563-1587.

Eigenvalues

Free-Vibration Analysis of Point-Supported Orthotropic Plates, D. J. Gorman, EM Jan. 94, p58-74.

Peak Load Determination in Linear Fictitious Crack Model, Yuan N. Li and Robert Y. Liang, EM Feb. 94, p232-249.

Elastic analysis

Comparison of Simple and Chebychev Polynomials in Rayleigh-Ritz Analysis, Sarvesh Singhvi and Rakesh K. Kapania, EM Oct. 94, p2126-2135.

Elastic foundations

Amplified Microbending in Coated Optical Fibres, John Roorda, EM Apr. 94, p917-921.

Large Deformation Analysis of Plates on Unilateral Elastic Foundation, A. A. Khathlan, EM Aug. 94, p1820-1827.

Rectangular Thick Plate with Free Edges on Pasternak Foundation, X. P. Shi, S. A. Tan and T. F. Fwa, EM May 94, p971-988.

Elastic media

Analytical Solutions for Harmonic Wave Propagation in Poroelastic Media, Chris Zimmerman and M. Stern, EM Oct. 94, p2154-2178.

Wave Attenuation in Elastic Continuum with Attenuating Neighborhood, Songtao Xue, Jun Tobita and Masanori Izumi, EM Mar. 94, p419-430.

Elastic properties

Thin-Walled Curved Beams. I: Formulation of Nonlinear Equations, Young J. Kang and Chai H. Yoo, EM Oct. 94, p2072-2101.

Thin-Walled Curved Beams. II: Analytical Solutions for Buckling of Arches, Young J. Kang and Chai H. Yoo, EM Oct. 94, p2102-2125.

Elastica

Large Deflection of Beams under Moment Gradient, S. Chucheepsakul, S. Buncharoen and C. M. Wang, EM Sept. 94, p1848-1860.

Elasticity

Analytical Solutions for Harmonic Wave Propagation in Poroelastic Media, Chris Zimmerman and M. Stern, EM Oct. 94, p2154-2178.

Dynamic Green's Functions of Homogeneous Poroelastic Half-Plane, T. Senjuntichai and R. K. N. D. Rajapakse, EM Nov. 94, p2381-2404.

Dynamics of Elastic Cable Under Parametric and External Resonances, Y. Cai and S. S. Chen, EM Aug. 94, p1786-1802.

Optimal Shakedown Design of Circular Plates, F. Giambanco, L. Palizzolo and C. Polizzotto, EM Dec. 94, p2535-2555.

Scaling Laws in Mechanics of Failure, Zdeněk P. Bažant, EM Sept. 93, p1828-1844.

Stability of Skew Mindlin Plates under Isotropic In-Plane Pressure, C. M. Wang, S. Kitipornchai, Y. Xiang and K. M. Liew, EM Feb. 93, p393-401.

Elastoplasticity

Finite-Element Analysis of Elastoplastic Discontinuities, Paul Steinmann and Kaspar Willam, EM Nov. 94, p2428-2442.

Hollow Spheres Subjected to Sustained and Variable Loads, Wei Jiang, EM June 94, p1343-1368.

Material Model for Concrete in Cracked and Uncracked States, R. Meyer, H. Ahrens and H. Duddeck, EM Sept. 94, p1877-1895.

Nonlinear Geometric and Material Behavior of Shell Structures with Large Strains, S. A. Schimmels and A. N. Palazotto, EM Feb. 94, p320-345.

Embedded foundations

Analysis of Embedded Foundations by Substructure-Deletion Method, R. Betti and A. M. Abdel-Ghaffar, EM June 94, p1283-1303.

Energy dissipation

Stability Theory of Cohesive Crack Model, Yuan N. Li and Robert Y. Liang, EM Mar. 92, p587-603.

Energy methods

Energy Method for Nonlinear Random Vibrations in MDF Systems, Long Yun Jia, EM Apr. 94, p910-916.

Energy-Based Dynamic Analysis of Secondary Systems, Genda Chen and T. T. Soong, EM Mar. 94, p514-534.

Envelope curves

Distributions of Envelope and Phase in Weakly Nonlinear Random Waves, M. Aziz Tayfun, EM May 94, p1009-1025.

Equations of motion

Analytical Solutions for Harmonic Wave Propagation in Poroelastic Media, Chris Zimmerman and M. Stern, EM Oct. 94, p2154-2178.

Equilibrium

Limit Analysis and Optimal Design of Plates with Equilibrium Elements, S. Krenk, L. Damkilde and O. Høyer, EM June 94, p1237-1254.

Error analysis

Equivalent Linearization for Seismic Responses. I: Formulation and Error Analysis, Young J. Park, EM Nov. 92, p2207-2226.

Error Evaluation of Three Random-Field Generators, Gordon A. Fenton, EM Dec. 94, p2478-2497.

Estuaries

Characterization of Circulation and Salinity Change in Galveston Bay, Keh-Han Wang, EM Mar. 94, p557-579.

Excitation

Dynamic Behavior of Nonlinear Cable System. III, Dan M. Ghiocel and Dario A. Gasparini, EM Dec. 94, p2694-2712.

Dynamics of Elastic Cable Under Parametric and External Resonances, Y. Cai and S. S. Chen, EM Aug. 94, p1786-1802.

Frequency Analysis in Stochastic Linearization, F. Casciati, L. Faravelli and P. Venini, EM Dec. 94, p2498-2518.

Ground-Motion Spatial Variation Effects on Circular Arch Responses, Hong Hao, EM Nov. 94, p2326-2341.

Reliability of Uncertain Nonlinear Trusses Under Random Excitation. II, R.-H. Cherng and Y. K. Wen, EM Apr. 94, p748-757.

Reliability of Uncertain Nonlinear Trusses Under Random Excitation. I, R.-H. Cherng and Y. K. Wen, EM Apr. 94, p733-747.

Responses of Dynamic Systems Excited by Non-Gaussian Pulse Processes, Sau-Lon James Hu, EM Sept. 93, p1818-1827.

Failures

Cone-Cylinder Intersection under Pressure: Axisymmetric Failure, Jin-Guang Teng, EM Sept. 94, p1896-1912.

First-Passage Time of Secondary System Mounted on Yielding Structure, David C. K. Chen and Loren D. Lutes, EM Apr. 94, p814-834.

Hyperspace Division Method for Structural Reliability, Satoshi Katsuki and Dan M. Frangopol, EM Nov. 94, p2405-2427.

Scaling Laws in Mechanics of Failure, Zdeněk P. Bažant, EM Sept. 93, p1828-1844.

Second-Order Upper Bounds on Probability of Intersection of Failure Events, Qiang Xiao and Sankaran Mahadevan, EM Mar. 94, p670-674.

Fatigue

Fatigue Crack Growth Rate of Metal by Plastic Energy Damage Accumulation Theory, Wei Wang and Cheng-Tzu Thomas Hsu, EM Apr. 94, p776-795.

Fatigue life

Fatigue Lifetime with Load Uncertainty Represented by Convex Model, Yakov Ben-Haim, EM Mar. 94, p445-462.

Feedback control

Optimal Configuration of Active-Control Mechanisms, Mohamed Abdel-Mooty and John Roorda, EM Mar. 94, p535-556.

Fiber optics

Amplified Microbending in Coated Optical Fibres, John Roorda, EM Apr. 94, p917-921.

Experimental Study of Embedded Fiber-Optic Strain Gauges in Concrete Structures, S. F. Masri, M. S. Agbabian, A. M. Abdel-Ghaffar, M. Higazy, R. O. Claus and M. J. de Vries, EM Aug. 94, p1696-1717.

Fiber reinforced materials

Determination of Interfacial Debond Mode for Fiber-Reinforced Cementitious Composites, Victor C. Li and Yin-Wen Chan, EM Apr. 94, p707-719.

New Formulation for Elastic Modulus of Fiber-Reinforced, Quasibrittle Matrices, Jamil M. Alwan and Antoine E. Naaman, EM Nov. 94, p2443-2460.

Pullout of Inclined Fibers from Cementitious Matrix, C. Ouyang, A. Pacios and S. P. Shah, EM Dec. 94, p2641-2659.

Finite difference method

Large Deformation Analysis of Plates on Unilateral Elastic Foundation, A. A. Khathlan, EM Aug. 94, p1820-1827.

Turbulent Boundary Layer Over Flat Plate with Rigid and Flexible Surfaces, M. S. Abu Sharekh, S. K. Pathak, G. L. Asawa and P. D. Porey, EM Aug. 94, p1675-1695.

Finite element method

Buckle Propagation: Steady-State Finite-Element Analysis, André C. Nogueira and John L. Tassoulas, EM Sept. 94, p1931-1944.

Finite-Element Modeling of Deformation and Cracking in Early-Age Concrete, René de Borst and A. H. van den Boogaard, EM Dec. 94, p2519-2534.

Finite-Element Simulation of Ice-Sheet Indentation, H. A. Khoo and T. M. Hrudey, EM June 94, p1322-1342.

hp Version of Finite-Element Mixed Method, Michelle M. Crull and P. K. Basu, EM Nov. 94, p2342-2360.

Instability of Tapered Thin-Walled Beams of Generic Section, Sundaramoorthy Rajasekaran, EM Aug. 94, p1630-1640.

Large Deflection of Imperfect Plates by Iterative Be-Fe Method, Jianqiao Ye, EM Mar. 94, p431-444.

Limit Analysis and Optimal Design of Plates with Equilibrium Elements, S. Krenk, L. Damkilde and O. Høyer, EM June 94, p1237-1254.

Load-Carrying Mechanism of Restrained Plates at Large Deflections, Zhiliang Fan, EM June 94, p1388-1391.

Model-Correction-Factor Method in Structural Reliability, Ove Ditlevsen and Torben Arnbjerg-Nielsen, EM Jan. 94, p1-10.

Nonlocal Damage Theory Based on Micromechanics of Crack Interactions, Zdeněk P. Bažant, EM Mar. 94, p593-617.

Orthogonal Series Expansions of Random Fields in Reliability Analysis, Jun Zhang and Bruce Ellingwood, EM Dec. 94, p2660-2677.

Peak Load Determination in Linear Fictitious Crack Model, Yuan N. Li and Robert Y. Liang, EM Feb. 94, p232-249.

Postbuckling of Moderately Thick Circular Plates With Edge Elastic Restraint, G. Venkateswara Rao, N. Rajasekhara Naidu and K. Kanaka Raju, EM Oct. 94, p2232-2238.

Regularized Method in Limit Analysis, Gong-Liang Jiang, EM June 94, p1179-1197.

Finite elements

Comment on Global/Local Method for Low-Velocity Impact Problems, Minggang Zhou and William P. Schonberg, EM May 94, p1042-1056.

Composite Beam Element with Layerwise Plane Sections, Youngchan Kim, Julio F. Davalos and Ever J. Barbero, EM May 94, p1160-1166.

Cone-Cylinder Intersection under Pressure: Axisymmetric Failure, Jin-Guang Teng, EM Sept. 94, p1896-1912.

Element-Level System Identification with Unknown Input, Duan Wang and Achintya Haldar, EM Jan. 94, p159-176.

Finite-Element Analysis of Elastoplastic Discontinuities, Paul Steinmann and Kaspar Willam, EM Nov. 94, p2428-2442.

Galerkin Sampling Method for Stochastic Mechanics Problems, P. D. Spanos and B. A. Zeldin, EM May 94, p1091-1106.

Inverse Reliability Problem, Armen Der Kiureghian, Yan Zhang and Chun-Ching Li, EM May 94, p1154-1159.

Nonlinear Finite Deformation Analysis of Beams and Columns, Ronald Y. S. Pak and Eric J. Stauffer, EM Oct. 94, p2136-2153.

Nonlinear Geometric and Material Behavior of Shell Structures with Large Strains, S. A. Schimmels and A. N. Palazotto, EM Feb. 94, p320-345.

Nonlinear Model for Building-Soil Systems, D. B. McCallen and K. M. Romstad, EM May 94, p1129-1152.

Postcracking Formulation for Analysis of RC Structures Based on Secant Stiffness, Ananth Ramaswamy, F. Barzegar and G. Z. Voyiadjis, EM Dec. 94, p2621-2640.

Probabilistic Nonlocal Damage Model for Continua with Random Field Properties, J. Carmeliet and H. Hens, EM Oct. 94, p2013-2027.

Reliability of Uncertain Nonlinear Trusses Under Random Excitation. II, R.-H. Cherng and Y. K. Wen, EM Apr. 94, p748-757.

Reliability of Uncertain Nonlinear Trusses Under Random Excitation. I, R.-H. Cherng and Y. K. Wen, EM Apr. 94, p733-747.

Simple Semi-Loof Element for Analyzing Folded-Plate Structures, K. Y. Sze, EM Jan. 94, p120-134.

Finite strip method

Local Buckling by Complex Finite Strip Method Using Bubble Functions, Mojtaba Azhari and Mark Andrew Bradford, EM Jan. 94, p43-57.

Fires

Moisture and Heat Flow in Concrete Walls Exposed to Fire, Jana Selih, Antonio C. M. Sousa and Theodore W. Bremner, EM Oct. 94, p2028-2043.

Fixed objects

Poisson Effect in Extensive Cables with Both Ends Fixed, John V. Huddleston and Hee-Jung Ham, EM July 94, p1590-1595.

Flexibility

Effect of Flexibility on Impedance Functions for Circular Foundation, Gin-Show Liou and Pao-Han Huang, EM July 94, p1429-1446.

High-Order Bending of Sandwich Beams with Transversely Flexible Core and Nonparallel Skins, D. Peled and Y. Frostig, EM June 94, p1255-1269.

Identification of Aeroelastic Parameters of Flexible Bridges, Partha P. Sarkar, Nicholas P. Jones and Robert H. Scanlan, EM Aug. 94, p1718-1742.

Turbulent Boundary Layer Over Flat Plate with Rigid and Flexible Surfaces, M. S. Abu Sharekh, S. K. Pathak, G. L. Asawa and P. D. Porey, EM Aug. 94, p1675-1695.

Flexible pavements

Importance of Speed and Frequency in Flexible Pavement Response, M. S. A. Hardy and D. Cebon, EM Mar. 94, p463-482.

Floating structures

Composite 2D/3D Hydroelastic-Analysis Method for Floating Structures, Xiling Che, H. Ronald Riggs and R. Cengiz Ertekin, EM July 94, p1499-1520.

Flow characteristics

Turbulent Boundary Layer Over Flat Plate with Rigid and Flexible Surfaces, M. S. Abu Sharekh, S. K. Pathak, G. L. Asawa and P. D. Porey, EM Aug. 94, p1675-1695.

Fluid flow

Spectral Analysis of Fluid Flow in Oscillating Grid Reactor, Leonard W. Casson, Desmond F. Lawler and David G. Bogard, EM Feb. 94, p346-367.

Fluid-structure interaction

Composite 2D/3D Hydroelastic-Analysis Method for Floating Structures, Xiling Che, H. Ronald Riggs and R. Cengiz Ertekin, EM July 94, p1499-1520.

Foam

Anisotropic Plasticity Model for Foams and Honeycombs, H. L. Schreyer, Q. H. Zuo and A. K. Maji, EM Sept. 94, p1913-1930.

Folded plates

Simple Semi-Loof Element for Analyzing Folded-Plate Structures, K. Y. Sze, EM Jan. 94, p120-134.

Forced vibration

Steady-State Oscillation of Hysteretic Differential Model. I: Response Analysis, C. W. Wong, Y. Q. Ni and S. L. Lau, EM Nov. 94, p2271-2298.

Foundations

Effect of Boundary Conditions on Buckling of Friction Piles, Mohammed A. Gabr, Jibai Wang and Sam A. Kiger, EM June 94, p1392-1400.

Effect of Flexibility on Impedance Functions for Circular Foundation, Gin-Show Liou and Pao-Han Huang, EM July 94, p1429-1446.

Fourier series

Stress and Displacement of Thick Doubly Curved Laminated Shells, Chih-Ping Wu and Chi-Chuan Liu, EM July 94, p1403-1428.

Fourier transform

Plane Orthotropic Layer by Transfer Matrix–Spline Boundary Element, L. Z. Jiang and J. S. Lee, EM May 94, p1026-1041.

Fracture mechanics

Effects of Process Zones on Crack Interactions, K. R. Shah, J. F. Labuz and H. K. Stolarski, EM Dec. 94, p2678-2693.

Fractals, Fractures, and Size Effects in Concrete, Victor E. Saouma and Christopher C. Barton, EM Apr. 94, p835-854.

Peak Load Determination in Linear Fictitious Crack Model, Yuan N. Li and Robert Y. Liang, EM Feb. 94, p232-249.

Penetration Fracture of Ice Plate: 2D Analysis and Size Effect, Yuan-Neng Li and Zdeněk P. Bažant, EM July 94, p1481-1498.

Penetration Fracture of Sea Ice Plate: Simplified Analysis and Size Effect, Zdeněk P. Bažant and Yuan-Neng Li, EM June 94, p1304-1321.

Pullout of Inclined Fibers from Cementitious Matrix, C. Ouyang, A. Pacios and S. P. Shah, EM Dec. 94, p2641-2659.

Scaling Laws in Mechanics of Failure, Zdeněk P. Bažant, EM Sept. 93, p1828-1844.

Stability Theory of Cohesive Crack Model, Yuan N. Li and Robert Y. Liang, EM Mar. 92, p587-603.

Two New Methods of Fictitious-Crack Model and Their Applications, Yuan N. Li, Michael Müller and J.-D. Wörner, EM Dec. 94, p2604-2620.

Fractures

Localization Analysis of Nonlocal Model Based on Crack Interactions, Milan Jirásek and Zdeněk P. Bažant, EM July 94, p1521-1542.

Framed structures

Analysis of Free Vibrations of Tall Buildings, Qiusheng Li, Hong Cao and Guiqing Li, EM Sept. 94, p1861-1876.

Frames

Dynamic Stability of Imperfect Frames Under Joint Displacements, D. S. Sophianopoulos and A. N. Kounadis, EM Aug. 94, p1661-1674.

Frequency

Frequency Domain Optimal Control Strategies for Aseismic Protection, B. F. Spencer, Jr., J. Suhardjo and M. K. Sain, EM Jan. 94, p135-158.

Importance of Speed and Frequency in Flexible Pavement Response, M. S. A. Hardy and D. Cebon, EM Mar. 94, p463-482.

Vibration of Mindlin Plates on Point Supports Using Constraint Functions, K. M. Liew, Y. Xiang, S. Kitipornchai and M. K. Lim, EM Mar. 94, p499-513.

Frequency analysis

Frequency Analysis in Stochastic Linearization, F. Casciati, L. Faravelli and P. Venini, EM Dec. 94, p2498-2518.

Frequency response

Steady-State Oscillation of Hysteretic Differential Model. I: Response Analysis, C. W. Wong, Y. Q. Ni and S. L. Lau, EM Nov. 94, p2271-2298.

Friction piles

Effect of Boundary Conditions on Buckling of Friction Piles, Mohammed A. Gabr, Jibai Wang and Sam A. Kiger, EM June 94, p1392-1400.

Gaussian process

Reexamination of Convex Polyhedron Outcrossing Problem, Ove Ditlevsen, EM Mar. 94, p654-660.

Geometric nonlinearity

Load-Carrying Mechanism of Restrained Plates at Large Deflections, Zhiliang Fan, EM June 94, p1388-1391.

Geometry

Fractals, Fractures, and Size Effects in Concrete, Victor E. Saouma and Christopher C. Barton, EM Apr. 94, p835-854.

Nonlinear Geometric and Material Behavior of Shell Structures with Large Strains, S. A. Schimmels and A. N. Palazotto, EM Feb. 94, p320-345.

Glass plates

Edge Strength of Window Glass by Mechanical Test, Chris P. Pantelides, Gregory P. Sallee and Joseph E. Minor, EM May 94, p1076-1090.

Gravity loads

Stability of Masonry Piers and Arches Including Sliding, Thomas E. Boothby, EM Feb. 94, p304-319.

Greens function

Dynamic Green's Functions of Homogeneous Poroelastic Half-Plane, T. Senjuntichai and R. K. N. D. Rajapakse, EM Nov. 94, p2381-2404.

Ground motion

Conditioned Stochastic Processes for Conditional Random Fields, Hiroyuki Kameda and Hitoshi Morikawa, EM Apr. 94, p855-875.

Ground-Motion Spatial Variation Effects on Circular Arch Responses, Hong Hao, EM Nov. 94, p2326-2341.

Simulation of Multi-Dimensional, Anisotropic Ground Motions, O. Ramadan and M. Novak, EM Aug. 94, p1773-1785.

Hardness

Constitutive Theory of Interface Behavior in Quasi-Brittle Materials, H. Y. Yang and Ming L. Wang, EM Dec. 94, p2588-2603.

New Kinematic Hardening Model, Wei Jiang, EM Oct. 94, p2201-2222.

Heat transfer

Moisture and Heat Flow in Concrete Walls Exposed to Fire, Jana Selih, Antonio C. M. Sousa and Theodore W. Bremner, EM Oct. 94, p2028-2043.

Hinges

Effect of Initial Curvature on Natural Frequency of Thin Plate on Hinge Supports, Qiulin Yu, Naser Mostaghel and Kuan-Chen Fu, EM Apr. 94, p796-813.

Hollow sections

Hollow Spheres Subjected to Sustained and Variable Loads, Wei Jiang, EM June 94, p1343-1368.

Honeycomb structures

Anisotropic Plasticity Model for Foams and Honeycombs, H. L. Schreyer, Q. H. Zuo and A. K. Maji, EM Sept. 94, p1913-1930.

Hydrodynamics

Characterization of Circulation and Salinity Change in Galveston Bay, Keh-Han Wang, EM Mar. 94, p557-579.

Free-Vibration Analysis of Tank Containing Two Liquids, Yu Tang, EM Mar. 94, p618-636.

Hydroelasticity

Composite 2D/3D Hydroelastic-Analysis Method for Floating Structures, Xiling Che, H. Ronald Riggs and R. Cengiz Ertekin, EM July 94, p1499-1520.

Hysteresis

Frequency Analysis in Stochastic Linearization, F. Casciati, L. Faravelli and P. Venini, EM Dec. 94, p2498-2518.

Hysteretic systems

Control of Hysteretic System Using Velocity and Acceleration Feedbacks, J. N. Yang, Z. Li and S. C. Liu, EM Nov. 92, p2227-2245.

Steady-State Oscillation of Hysteretic Differential Model. I: Response Analysis, C. W. Wong, Y. Q. Ni and S. L. Lau, EM Nov. 94, p2271-2298.

Steady-State Oscillation of Hysteretic Differential Model. II: Performance Analysis, C. W. Wong, Y. Q. Ni and J. M. Ko, EM Nov. 94, p2299-2325.

Ice

Finite-Element Simulation of Ice-Sheet Indentation, H. A. Khoo and T. M. Hrudey, EM June 94, p1322-1342.

Penetration Fracture of Sea Ice Plate: Simplified Analysis and Size Effect, Zdeněk P. Bažant and Yuan-Neng Li, EM June 94, p1304-1321.

Ice mechanics

Penetration Fracture of Ice Plate: 2D Analysis and Size Effect, Yuan-Neng Li and Zdeněk P. Bažant, EM July 94, p1481-1498.

Ice sheets

Finite-Element Simulation of Ice-Sheet Indentation, H. A. Khoo and T. M. Hrudey, EM June 94, p1322-1342.

Penetration Fracture of Ice Plate: 2D Analysis and Size Effect, Yuan-Neng Li and Zdeněk P. Bažant, EM July 94, p1481-1498.

Identification

Element-Level System Identification with Unknown Input, Duan Wang and Achintya Haldar, EM Jan. 94, p159-176.

Identification and Uncertainty Estimation of Structural Parameters, C. G. Koh and L. M. See, EM June 94, p1219-1236.

Identification of Aeroelastic Parameters of Flexible Bridges, Partha P. Sarkar, Nicholas P. Jones and Robert H. Scanlan, EM Aug. 94, p1718-1742.

Impact

Comment on Global/Local Method for Low-Velocity Impact Problems, Minggang Zhou and William P. Schonberg, EM May 94, p1042-1056.

Impedance

Effect of Flexibility on Impedance Functions for Circular Foundation, Gin-Show Liou and Pao-Han Huang, EM July 94, p1429-1446.

Imperfections

Dynamic Stability of Imperfect Frames Under Joint Displacements, D. S. Sophianopoulos and A. N. Kounadis, EM Aug. 94, p1661-1674.

Large Deflection of Imperfect Plates by Iterative Be-Fe Method, Jianqiao Ye, EM Mar. 94, p431-444.

Impulsive loads

Comment on Global/Local Method for Low-Velocity Impact Problems, Minggang Zhou and William P. Schonberg, EM May 94, p1042-1056.

Inelastic action

Fracture Energy Formulation for Inelastic Behavior of Plain Concrete, G. Etse and K. Willam, EM Sept. 94, p1983-2011.

Localization Analysis of Nonlocal Model Based on Crack Interactions, Milan Jirásek and Zdeněk P. Bažant, EM July 94, p1521-1542.

Nonlocal Damage Theory Based on Micromechanics of Crack Interactions, Zdeněk P. Bažant, EM Mar. 94, p593-617.

Integrals

Variability Response Functions of Stochastic Plane Stress/Strain Problems, Friedrich J. Wall and George Deodatis, EM Sept. 94, p1963-1982.

Interactions

Dynamic Stress Intensity Factor for Subsurface Inclined Cracks, Chien-Ching Ma and Szu-Kuzi Chen, EM Mar. 94, p483-498.

Effects of Process Zones on Crack Interactions, K. R. Shah, J. F. Labuz and H. K. Stolarski, EM Dec. 94, p2678-2693.

Localization Analysis of Nonlocal Model Based on Crack Interactions, Milan Jirásek and Zdeněk P. Bažant, EM July 94, p1521-1542.

Rectangular Thick Plate with Free Edges on Pasternak Foundation, X. P. Shi, S. A. Tan and T. F. Fwa, EM May 94, p971-988.

Interfaces

Constitutive Theory of Interface Behavior in Quasi-Brittle Materials, H. Y. Yang and Ming L. Wang, EM Dec. 94, p2588-2603.

New Formulation for Elastic Modulus of Fiber-Reinforced, Quasibrittle Matrices, Jamil M. Alwan and Antoine E. Naaman, EM Nov. 94, p2443-2460.

Size Effect in Fiber or Bar Pullout with Interface Softening Slip, Zdeněk P. Bažant and Rodrigue Desmorat, EM Sept. 94, p1945-1962.

Internal pressure

Cone-Cylinder Intersection under Pressure: Axisymmetric Failure, Jin-Guang Teng, EM Sept. 94, p1896-1912.

Shakedown Analysis of Hollow Spheres, Wei Jiang, EM July 94, p1447-1480.

Intersections

Cone-Cylinder Intersection under Pressure: Axisymmetric Failure, Jin-Guang Teng, EM Sept. 94, p1896-1912.

Kalman filter

Identification and Uncertainty Estimation of Structural Parameters, C. G. Koh and L. M. See, EM June 94, p1219-1236.

Kinematics

New Kinematic Hardening Model, Wei Jiang, EM Oct. 94, p2201-2222.

Laminated wood

Composite Beam Element with Layerwise Plane Sections, Youngchan Kim, Julio F. Davalos and Ever J. Barbero, EM May 94, p1160-1166.

Laminates

Buckling Mode Change of Antisymmetric Angle-Ply Laminates, Wen-Chi Chen, EM Mar. 94, p661-669.

Free Vibrations of Laminated Anisotropic Cylindrical Shells, P. R. Heyliger and A. Jilani, EM May 93, p1062-1077.

Stress and Displacement of Thick Doubly Curved Laminated Shells, Chih-Ping Wu and Chi-Chuan Liu, EM July 94, p1403-1428.

Large structures

Stochastic Vehicle-Queue-Load Model for Large Bridges, Ove Ditlevsen and Henrik O. Madsen, EM Sept. 94, p1829-1847.

Traffic Loads on Large Bridges Modeled as White-Noise Fields, Ove Ditlevsen, EM Apr. 94, p681-694.

Lateral loads

Load-Carrying Mechanism of Restrained Plates at Large Deflections, Zhiliang Fan, EM June 94, p1388-1391.

Stability of Masonry Piers and Arches Including Sliding, Thomas E. Boothby, EM Feb. 94, p304-319.

Layered systems

Plane Orthotropic Layer by Transfer Matrix-Spline Boundary Element, L. Z. Jiang and J. S. Lee, EM May 94, p1026-1041.

Limit analysis
Limit Analysis and Optimal Design of Plates with Equilibrium Elements, S. Krenk, L. Damkilde and O. Høyer, EM June 94, p1237-1254.

Regularized Method in Limit Analysis, Gong-Liang Jiang, EM June 94, p1179-1197.

Limit states
Hyperspace Division Method for Structural Reliability, Satoshi Katsuki and Dan M. Frangopol, EM Nov. 94, p2405-2427.

Inverse Reliability Problem, Armen Der Kiureghian, Yan Zhang and Chun-Ching Li, EM May 94, p1154-1159.

Linear systems
Approximate Random Vibration Analysis of Classically Damped MDOF Systems, C. Papadimitriou and J. L. Beck, EM Jan. 94, p75-96.

Fatigue Lifetime with Load Uncertainty Represented by Convex Model, Yakov Ben-Haim, EM Mar. 94, p445-462.

Linearity
Wave Motion Through Porous Structures, Xiping Yu and Allen T. Chwang, EM May 94, p989-1008.

Liquefaction
Procedures for Elastoplastic Liquefaction Modeling of Sands, A. Anandarajah, EM July 94, p1563-1587.

Liquids
Dynamic Response of Tank Containing Two Liquids, Yu Tang, EM Mar. 93, p531-548.

Load factors
Stochastic Vehicle-Queue-Load Model for Large Bridges, Ove Ditlevsen and Henrik O. Madsen, EM Sept. 94, p1829-1847.

Loading
Two New Methods of Fictitious-Crack Model and Their Applications, Yuan N. Li, Michael Müller and J.-D. Wörner, EM Dec. 94, p2604-2620.

Loading history
Fatigue Lifetime with Load Uncertainty Represented by Convex Model, Yakov Ben-Haim, EM Mar. 94, p445-462.

Loads
Analytical Solution for Bending of Coaxial Orthotropic Cylinders, Claude Jolicoeur and Alain Cardou, EM Dec. 94, p2556-2574.

Buckling of Plates with Stiffening Elastically-Restrained Edges, Raymond H. Plaut and Ardéshir Guran, EM Feb. 94, p408-411.

Buckling Solutions of Rectangular Mindlin Plates under Uniform Shear, C. M. Wang, Y. Xiang and S. Kitipornchai, EM Nov. 94, p2462-2470.

Fatigue Lifetime with Load Uncertainty Represented by Convex Model, Yakov Ben-Haim, EM Mar. 94, p445-462.

Hollow Spheres Subjected to Sustained and Variable Loads, Wei Jiang, EM June 94, p1343-1368.

Importance of Speed and Frequency in Flexible Pavement Response, M. S. A. Hardy and D. Cebon, EM Mar. 94, p463-482.

Peak Load Determination in Linear Fictitious Crack Model, Yuan N. Li and Robert Y. Liang, EM Feb. 94, p232-249.

Regularized Method in Limit Analysis, Gong-Liang Jiang, EM June 94, p1179-1197.

Location
Methodology for Optimum Sensor Locations for Parameter Identification in Dynamic Systems, Firdaus E. Udwadia, EM Feb. 94, p368-390.

Masonry
Stability of Masonry Piers and Arches Including Sliding, Thomas E. Boothby, EM Feb. 94, p304-319.

Mass transfer
Moisture and Heat Flow in Concrete Walls Exposed to Fire, Jana Selih, Antonio C. M. Sousa and Theodore W. Bremner, EM Oct. 94, p2028-2043.

Materials
New Kinematic Hardening Model, Wei Jiang, EM Oct. 94, p2201-2222.

Materials failure
Dynamic Stress Intensity Factor for Subsurface Inclined Cracks, Chien-Ching Ma and Szu-Kuzi Chen, EM Mar. 94, p483-498.

Materials testing
Edge Strength of Window Glass by Mechanical Test, Chris P. Pantelides, Gregory P. Sallee and Joseph E. Minor, EM May 94, p1076-1090.

Mathematical models
Mechanics of Growing Deformable Solids: A Review, Vyacheslav E. Naumov, EM Feb. 94, p207-220.

Stability Theory of Cohesive Crack Model, Yuan N. Li and Robert Y. Liang, EM Mar. 92, p587-603.

Measurement
Experimental Study of Embedded Fiber-Optic Strain Gauges in Concrete Structures, S. F. Masri, M. S. Agbabian, A. M. Abdel-Ghaffar, M. Higazy, R. O. Claus and M. J. de Vries, EM Aug. 94, p1696-1717.

Mechanical properties
Postbuckling of Moderately Thick Circular Plates With Edge Elastic Restraint, G. Venkateswara Rao, N. Rajasekhara Naidu and K. Kanaka Raju, EM Oct. 94, p2232-2238.

Metals
Fatigue Crack Growth Rate of Metal by Plastic Energy Damage Accumulation Theory, Wei Wang and Cheng-Tzu Thomas Hsu, EM Apr. 94, p776-795.

Microstructure
Effects of Process Zones on Crack Interactions, K. R. Shah, J. F. Labuz and H. K. Stolarski, EM Dec. 94, p2678-2693.

Model accuracy
Model-Correction-Factor Method in Structural Reliability, Ove Ditlevsen and Torben Arnbjerg-Nielsen, EM Jan. 94, p1-10.

Modeling
Characterization of Circulation and Salinity Change in Galveston Bay, Keh-Han Wang, EM Mar. 94, p557-579.

Error Evaluation of Three Random-Field Generators, Gordon A. Fenton, EM Dec. 94, p2478-2497.

Modified Eddy Viscosity Model in Fully Developed Asymmetric Channel Flows, Whey-Fone Tsai and Robert Ettema, EM Apr. 94, p720-732.

Two New Methods of Fictitious-Crack Model and Their Applications, Yuan N. Li, Michael Müller and J.-D. Wörner, EM Dec. 94, p2604-2620.

Volterra Models of Ocean Structures: Extreme and Fatigue Reliability, S. R. Winterstein, T. C. Ude and T. Marthinsen, EM June 94, p1369-1385.

Models
Material Model for Concrete in Cracked and Uncracked States, R. Meyer, H. Ahrens and H. Duddeck, EM Sept. 94, p1877-1895.

Model-Correction-Factor Method in Structural Reliability, Ove Ditlevsen and Torben Arnbjerg-Nielsen, EM Jan. 94, p1-10.

New Kinematic Hardening Model, Wei Jiang, EM Oct. 94, p2201-2222.

Peak Load Determination in Linear Fictitious Crack Model, Yuan N. Li and Robert Y. Liang, EM Feb. 94, p232-249.

Modulus of elasticity
New Formulation for Elastic Modulus of Fiber-Reinforced, Quasibrittle Matrices, Jamil M. Alwan and Antoine E. Naaman, EM Nov. 94, p2443-2460.

Moisture content
Moisture and Heat Flow in Concrete Walls Exposed to Fire, Jana Selih, Antonio C. M. Sousa and Theodore W. Bremner, EM Oct. 94, p2028-2043.

Moment distribution
Structural System Changes by Means of Forcedly Applied Restraints, Angelo Marcello Tarantino, EM Feb. 94, p392-399.

Moments
hp Version of Finite-Element Mixed Method, Michelle M. Crull and P. K. Basu, EM Nov. 94, p2342-2360.

Point-Estimate Method for Calculating Statistical Moments, K. S. Li, EM July 92, p1506-1511.

Monitoring
Application of Neural Networks in Vibrational Signature Analysis, M. F. Elkordy, K. C. Chang and G. C. Lee, EM Feb. 94, p250-265.

Monte Carlo method
Galerkin Sampling Method for Stochastic Mechanics Problems, P. D. Spanos and B. A. Zeldin, EM May 94, p1091-1106.

Probabilistic Nonlocal Damage Model for Continua with Random Field Properties, J. Carmeliet and H. Hens, EM Oct. 94, p2013-2027.

Natural frequency
Analysis of Free Vibrations of Tall Buildings, Qiusheng Li, Hong Cao and Guiqing Li, EM Sept. 94, p1861-1876.

Effect of Initial Curvature on Natural Frequency of Thin Plate on Hinge Supports, Qiulin Yu, Naser Mostaghel and Kuan-Chen Fu, EM Apr. 94, p796-813.

Free Vibrations of Laminated Anisotropic Cylindrical Shells, P. R. Heyliger and A. Jilani, EM May 93, p1062-1077.

Neural networks
Application of Neural Networks in Vibrational Signature Analysis, M. F. Elkordy, K. C. Chang and G. C. Lee, EM Feb. 94, p250-265.

Noise
Identification and Uncertainty Estimation of Structural Parameters, C. G. Koh and L. M. See, EM June 94, p1219-1236.

Nondestructive tests
Element-Level System Identification with Unknown Input, Duan Wang and Achintya Haldar, EM Jan. 94, p159-176.

Nonlinear analysis
Dynamic Stability of Imperfect Frames Under Joint Displacements, D. S. Sophianopoulos and A. N. Kounadis, EM Aug. 94, p1661-1674.

Lateral Postbuckling Analysis of Beam-Columns, A. N. Kounadis and G. I. Ioannidis, EM Apr. 94, p695-706.

Nonlinear Finite Deformation Analysis of Beams and Columns, Ronald Y. S. Pak and Eric J. Stauffer, EM Oct. 94, p2136-2153.

Nonlinear Model for Building-Soil Systems, D. B. McCallen and K. M. Romstad, EM May 94, p1129-1152.

Thin-Walled Curved Beams. I: Formulation of Nonlinear Equations, Young J. Kang and Chai H. Yoo, EM Oct. 94, p2072-2101.

Thin-Walled Curved Beams. II: Analytical Solutions for Buckling of Arches, Young J. Kang and Chai H. Yoo, EM Oct. 94, p2102-2125.

Nonlinear response
Nonlinear Stochastic Response and Reliability of Secondary Systems, C. D. Huang, W. Q. Zhu and T. T. Soong, EM Jan. 94, p177-196.

Nonlinear systems
Control of Hysteretic System Using Velocity and Acceleration Feedbacks, J. N. Yang, Z. Li and S. C. Liu, EM Nov. 92, p2227-2245.

Distributions of Envelope and Phase in Weakly Nonlinear Random Waves, M. Aziz Tayfun, EM May 94, p1009-1025.

Dynamic Behavior of Nonlinear Cable System. III, Dan M. Ghiocel and Dario A. Gasparini, EM Dec. 94, p2694-2712.

Energy Method for Nonlinear Random Vibrations in MDF Systems, Long Yun Jia, EM Apr. 94, p910-916.

Equivalent Linearization for Seismic Responses. I: Formulation and Error Analysis, Young J. Park, EM Nov. 92, p2207-2226.

First-Passage Time of Secondary System Mounted on Yielding Structure, David C. K. Chen and Loren D. Lutes, EM Apr. 94, p814-834.

Reliability of Uncertain Nonlinear Trusses Under Random Excitation. II, R.-H. Cherng and Y. K. Wen, EM Apr. 94, p748-757.

Reliability of Uncertain Nonlinear Trusses Under Random Excitation. I, R.-H. Cherng and Y. K. Wen, EM Apr. 94, p733-747.

Responses of Dynamic Systems Excited by Non-Gaussian Pulse Processes, Sau-Lon James Hu, EM Sept. 93, p1818-1827.

Single-Degree-of-Freedom Nonlinear Homogeneous Systems, José A. Inaudi, George Leitmann and James M. Kelly, EM July 94, p1543-1562.

Steady-State Oscillation of Hysteretic Differential Model. I: Response Analysis, C. W. Wong, Y. Q. Ni and S. L. Lau, EM Nov. 94, p2271-2298.

Volterra Models of Ocean Structures: Extreme and Fatigue Reliability, S. R. Winterstein, T. C. Ude and T. Marthinsen, EM June 94, p1369-1385.

Numerical analysis

Analytical Solution for Bending of Coaxial Orthotropic Cylinders, Claude Jolicoeur and Alain Cardou, EM Dec. 94, p2556-2574.

Axisymmetric Time-Domain Transmitting Boundaries, Andrew John Deeks and Mark Felton Randolph, EM Jan. 94, p25-42.

Composite Beam Element with Layerwise Plane Sections, Youngchan Kim, Julio F. Davalos and Ever J. Barbero, EM May 94, p1160-1166.

Computation of Turbulent Shear Flow Over Surface-Mounted Obstacle, Jianming He and Charles C. S. Song, EM Nov. 92, p2282-2297.

Discretization Influence on Regularization by Two Localization Limiters, Antonio Huerta and Gilles Pijaudier-Cabot, EM June 94, p1198-1218.

Dynamics of Elastic Cable Under Parametric and External Resonances, Y. Cai and S. S. Chen, EM Aug. 94, p1786-1802.

Large Deflection of Beams under Moment Gradient, S. Chucheepsakul, S. Buncharoen and C. M. Wang, EM Sept. 94, p1848-1860.

Plane Orthotropic Layer by Transfer Matrix–Spline Boundary Element, L. Z. Jiang and J. S. Lee, EM May 94, p1026-1041.

Rectangular Thick Plate with Free Edges on Pasternak Foundation, X. P. Shi, S. A. Tan and T. F. Fwa, EM May 94, p971-988.

Steady-State Oscillation of Hysteretic Differential Model. II: Performance Analysis, C. W. Wong, Y. Q. Ni and J. M. Ko, EM Nov. 94, p2299-2325.

Numerical calculations

Local Buckling by Complex Finite Strip Method Using Bubble Functions, Mojtaba Azhari and Mark Andrew Bradford, EM Jan. 94, p43-57.

Slender Rigid Block Motion, S. J. Hogan, EM Jan. 94, p11-24.

Numerical models

Conditioned Stochastic Processes for Conditional Random Fields, Hiroyuki Kameda and Hitoshi Morikawa, EM Apr. 94, p855-875.

Stability of Active-Tendon Structural Control with Time Delay, L. Zhang, C. Y. Yang, M. J. Chajes and A. H-D. Cheng, EM May 93, p1017-1024.

Offshore structures

Dynamic Modal Responses of Wave-Excited Offshore Structures, G. D. Hahn and J. R. Sanghvi, EM Apr. 94, p893-908.

Volterra Models of Ocean Structures: Extreme and Fatigue Reliability, S. R. Winterstein, T. C. Ude and T. Marthinsen, EM June 94, p1369-1385.

Open channel flow

No-Choke Flow in Trapezoidal Channels, Subhasish Dey, EM Oct. 94, p2224-2231.

Openings

Continuum Model for Analysis of Multiply Connected Perforated Cores, Domenico Capuani, Marco Savoia and Ferdinando Laudiero, EM Aug. 94, p1641-1660.

Optimal control methods

Control of Hysteretic System Using Velocity and Acceleration Feedbacks, J. N. Yang, Z. Li and S. C. Liu, EM Nov. 92, p2227-2245.

Frequency Domain Optimal Control Strategies for Aseismic Protection, B. F. Spencer, Jr., J. Suhardjo and M. K. Sain, EM Jan. 94, p135-158.

Generalization of Optimal Control Theory: Linear and Nonlinear Control, J. N. Yang, Z. Li and S. Vongchavalitkul, EM Feb. 94, p266-283.

Optimal design

Limit Analysis and Optimal Design of Plates with Equilibrium Elements, S. Krenk, L. Damkilde and O. Høyer, EM June 94, p1237-1254.

Optimal Design of Base-Isolated Structures with Dynamic Absorbers, S. C. Sinha and Guangning Li, EM Feb. 94, p221-231.

Optimal Shakedown Design of Circular Plates, F. Giambanco, L. Palizzolo and C. Polizzotto, EM Dec. 94, p2535-2555.

Optimization

Axisymmetric Plastic Plates with Ring Supports at Optimum Locations, C. M. Wang, S. K. Ting and W. A. M. Alwis, EM Feb. 94, p400-407.

Inverse Reliability Problem, Armen Der Kiureghian, Yan Zhang and Chun-Ching Li, EM May 94, p1154-1159.

Large Deflection of Beams under Moment Gradient, S. Chucheepsakul, S. Buncharoen and C. M. Wang, EM Sept. 94, p1848-1860.

Methodology for Optimum Sensor Locations for Parameter Identification in Dynamic Systems, Firdaus E. Udwadia, EM Feb. 94, p368-390.

Optimal Configuration of Active-Control Mechanisms, Mohamed Abdel-Mooty and John Roorda, EM Mar. 94, p535-556.

Regularized Method in Limit Analysis, Gong-Liang Jiang, EM June 94, p1179-1197.

Sensitivity Analysis of Reliability-Based Optimal Solution, Ib Enevoldsen, EM Jan. 94, p198-205.

Orthotropic

Analytical Solution for Bending of Coaxial Orthotropic Cylinders, Claude Jolicoeur and Alain Cardou, EM Dec. 94, p2556-2574.

Orthotropic plate

Free-Vibration Analysis of Point-Supported Orthotropic Plates, D. J. Gorman, EM Jan. 94, p58-74.

Oscillators

Single-Degree-of-Freedom Nonlinear Homogeneous Systems, José A. Inaudi, George Leitmann and James M. Kelly, EM July 94, p1543-1562.

Parameters

Identification and Uncertainty Estimation of Structural Parameters, C. G. Koh and L. M. See, EM June 94, p1219-1236.

Methodology for Optimum Sensor Locations for Parameter Identification in Dynamic Systems, Firdaus E. Udwadia, EM Feb. 94, p368-390.

Peak values

Peak Load Determination in Linear Fictitious Crack Model, Yuan N. Li and Robert Y. Liang, EM Feb. 94, p232-249.

Penetration

Penetration Fracture of Ice Plate: 2D Analysis and Size Effect, Yuan-Neng Li and Zdeněk P. Bažant, EM July 94, p1481-1498.

Penetration Fracture of Sea Ice Plate: Simplified Analysis and Size Effect, Zdeněk P. Bažant and Yuan-Neng Li, EM June 94, p1304-1321.

Piers

Stability of Masonry Piers and Arches Including Sliding, Thomas E. Boothby, EM Feb. 94, p304-319.

Pile foundations

Lateral Cyclic Response of Pile in ViscoElastic Winkler Subgrade, Shintaro Yao and Toyoaki Nogami, EM Apr. 94, p758-775.

Plastic analysis

Stability of Masonry Piers and Arches Including Sliding, Thomas E. Boothby, EM Feb. 94, p304-319.

Plastic deformation

New Kinematic Hardening Model, Wei Jiang, EM Oct. 94, p2201-2222.

Study of Two-Surface Plasticity Theory, Wei Jiang, EM Oct. 94, p2179-2200.

Plastic design

Axisymmetric Plastic Plates with Ring Supports at Optimum Locations, C. M. Wang, S. K. Ting and W. A. M. Alwis, EM Feb. 94, p400-407.

Plastic hinges

Frequency Analysis in Stochastic Linearization, F. Casciati, L. Faravelli and P. Venini, EM Dec. 94, p2498-2518.

Plastic properties

Equivalent Linearization for Seismic Responses. I: Formulation and Error Analysis, Young J. Park, EM Nov. 92, p2207-2226.

Plastic theory

Study of Two-Surface Plasticity Theory, Wei Jiang, EM Oct. 94, p2179-2200.

Plasticity

Anisotropic Plasticity Model for Foams and Honeycombs, H. L. Schreyer, Q. H. Zuo and A. K. Maji, EM Sept. 94, p1913-1930.

Buckle Propagation: Steady-State Finite-Element Analysis, André C. Nogueira and John L. Tassoulas, EM Sept. 94, p1931-1944.

Limit Analysis and Optimal Design of Plates with Equilibrium Elements, S. Krenk, L. Damkilde and O. Høyer, EM June 94, p1237-1254.

Nonlocal Damage Theory Based on Micromechanics of Crack Interactions, Zdeněk P. Bažant, EM Mar. 94, p593-617.

Optimal Shakedown Design of Circular Plates, F. Giambanco, L. Palizzolo and C. Polizzotto, EM Dec. 94, p2535-2555.

Scaling Laws in Mechanics of Failure, Zdeněk P. Bažant, EM Sept. 93, p1828-1844.

Steady-State Oscillation of Hysteretic Differential Model. II: Performance Analysis, C. W. Wong, Y. Q. Ni and J. M. Ko, EM Nov. 94, p2299-2325.

Study of Two-Surface Plasticity Theory, Wei Jiang, EM Oct. 94, p2179-2200.

Unified Critical-State Bounding-Surface Plasticity Model for Soil, Roger S. Crouch, John P. Wolf and Yannis F. Dafalias, EM Nov. 94, p2251-2270.

Plates

Axisymmetric Plastic Plates with Ring Supports at Optimum Locations, C. M. Wang, S. K. Ting and W. A. M. Alwis, EM Feb. 94, p400-407.

Bending of Cord Composite Plates, Carol Kittredge Shield and George A. Costello, EM Apr. 94, p876-892.

Buckling of Plates with Stiffening Elastically-Restrained Edges, Raymond H. Plaut and Ardéshir Guran, EM Feb. 94, p408-411.

Buckling Solutions of Rectangular Mindlin Plates under Uniform Shear, C. M. Wang, Y. Xiang and S. Kitipornchai, EM Nov. 94, p2462-2470.

Large Deflection of Imperfect Plates by Iterative Be-Fe Method, Jianqiao Ye, EM Mar. 94, p431-444.

Large Deformation Analysis of Plates on Unilateral Elastic Foundation, A. A. Khathlan, EM Aug. 94, p1820-1827.

Limit Analysis and Optimal Design of Plates with Equilibrium Elements, S. Krenk, L. Damkilde and O. Høyer, EM June 94, p1237-1254.

Local Buckling by Complex Finite Strip Method Using Bubble Functions, Mojtaba Azhari and Mark Andrew Bradford, EM Jan. 94, p43-57.

Optimal Shakedown Design of Circular Plates, F. Giambanco, L. Palizzolo and C. Polizzotto, EM Dec. 94, p2535-2555.

Penetration Fracture of Sea Ice Plate: Simplified Analysis and Size Effect, Zdeněk P. Bažant and Yuan-Neng Li, EM June 94, p1304-1321.

Postbuckling of Moderately Thick Circular Plates With Edge Elastic Restraint, G. Venkateswara Rao, N. Rajasekhara Naidu and K. Kanaka Raju, EM Oct. 94, p2232-2238.

Rectangular Thick Plate with Free Edges on Pasternak Foundation, X. P. Shi, S. A. Tan and T. F. Fwa, EM May 94, p971-988.

Simple Semi-Loof Element for Analyzing Folded-Plate Structures, K. Y. Sze, EM Jan. 94, p120-134.

Stability of Skew Mindlin Plates under Isotropic In-Plane Pressure, C. M. Wang, S. Kitipornchai, Y. Xiang and K. M. Liew, EM Feb. 93, p393-401.

Vibration of Mindlin Plates on Point Supports Using Constraint Functions, K. M. Liew, Y. Xiang, S. Kitipornchai and M. K. Lim, EM Mar. 94, p499-513.

Water Waves Above Submerged Porous Plate, Xiping Yu and Allen T. Chwang, EM June 94, p1270-1282.

Wave Scattering by Submerged Porous Disk, Allen T. Chwang and Jianhua Wu, EM Dec. 94, p2575-2587.

Poisson ratio

Poisson Effect in Extensive Cables with Both Ends Fixed, John V. Huddleston and Hee-Jung Ham, EM July 94, p1590-1595.

Polynomials

Comparison of Simple and Chebychev Polynomials in Rayleigh-Ritz Analysis, Sarvesh Singhvi and Rakesh K. Kapania, EM Oct. 94, p2126-2135.

Pore pressure

Dynamic Green's Functions of Homogeneous Poroelastic Half-Plane, T. Senjuntichai and R. K. N. D. Rajapakse, EM Nov. 94, p2381-2404.

Procedures for Elastoplastic Liquefaction Modeling of Sands, A. Anandarajah, EM July 94, p1563-1587.

Porosity

Analytical Solutions for Harmonic Wave Propagation in Poroelastic Media, Chris Zimmerman and M. Stern, EM Oct. 94, p2154-2178.

Dynamic Green's Functions of Homogeneous Poroelastic Half-Plane, T. Senjuntichai and R. K. N. D. Rajapakse, EM Nov. 94, p2381-2404.

New Formulation for Elastic Modulus of Fiber-Reinforced, Quasibrittle Matrices, Jamil M. Alwan and Antoine E. Naaman, EM Nov. 94, p2443-2460.

Porous materials

Water Waves Above Submerged Porous Plate, Xiping Yu and Allen T. Chwang, EM June 94, p1270-1282.

Wave Scattering by Submerged Porous Disk, Allen T. Chwang and Jianhua Wu, EM Dec. 94, p2575-2587.

Porous media

Analytical Solutions for Harmonic Wave Propagation in Poroelastic Media, Chris Zimmerman and M. Stern, EM Oct. 94, p2154-2178.

Moisture and Heat Flow in Concrete Walls Exposed to Fire, Jana Šelih, Antonio C. M. Sousa and Theodore W. Bremner, EM Oct. 94, p2028-2043.

Wave Motion Through Porous Structures, Xiping Yu and Allen T. Chwang, EM May 94, p989-1008.

Postbuckling behavior

Lateral Postbuckling Analysis of Beam-Columns, A. N. Kounadis and G. I. Ioannidis, EM Apr. 94, p695-706.

Postbuckling of Moderately Thick Circular Plates With Edge Elastic Restraint, G. Venkateswara Rao, N. Rajasekhara Naidu and K. Kanaka Raju, EM Oct. 94, p2232-2238.

Potential theory

Wave Motion Through Porous Structures, Xiping Yu and Allen T. Chwang, EM May 94, p989-1008.

Power spectral density

Ground-Motion Spatial Variation Effects on Circular Arch Responses, Hong Hao, EM Nov. 94, p2326-2341.

Spectral Analysis of Fluid Flow in Oscillating Grid Reactor, Leonard W. Casson, Desmond F. Lawler and David G. Bogard, EM Feb. 94, p346-367.

Predictive control

Modal Predictive Control of Structures. I: Formulation, F. López-Almansa, R. Andrade, J. Rodellar and A. M. Reinhorn, EM Aug. 94, p1743-1760.

Modal Predictive Control of Structures. II: Implementation, F. López-Almansa, R. Andrade, J. Rodellar and A. M. Reinhorn, EM Aug. 94, p1761-1772.

Pressures

Buckle Propagation: Steady-State Finite-Element Analysis, André C. Nogueira and John L. Tassoulas, EM Sept. 94, p1931-1944.

Shakedown Analysis of Hollow Spheres, Wei Jiang, EM July 94, p1447-1480.

Probabilistic methods

Inverse Reliability Problem, Armen Der Kiureghian, Yan Zhang and Chun-Ching Li, EM May 94, p1154-1159.

Probability

Hyperspace Division Method for Structural Reliability, Satoshi Katsuki and Dan M. Frangopol, EM Nov. 94, p2405-2427.

Probability density functions

Conditioned Stochastic Processes for Conditional Random Fields, Hiroyuki Kameda and Hitoshi Morikawa, EM Apr. 94, p855-875.

Probability distribution

Distributions of Envelope and Phase in Weakly Nonlinear Random Waves, M. Aziz Tayfun, EM May 94, p1009-1025.

Probability theory

Equivalent Linearization for Seismic Responses. I: Formulation and Error Analysis, Young J. Park, EM Nov. 92, p2207-2226.

Orthogonal Series Expansions of Random Fields in Reliability Analysis, Jun Zhang and Bruce Ellingwood, EM Dec. 94, p2660-2677.

Point-Estimate Method for Calculating Statistical Moments, K. S. Li, EM July 92, p1506-1511.

Random Vibration of Beam under Moving Loads, Giuseppe Ricciardi, EM Nov. 94, p2361-2380.

Second-Order Upper Bounds on Probability of Intersection of Failure Events, Qiang Xiao and Sankaran Mahadevan, EM Mar. 94, p670-674.

Pull-out resistance

Determination of Interfacial Debond Mode for Fiber-Reinforced Cementitious Composites, Victor C. Li and Yin-Wen Chan, EM Apr. 94, p707-719.

Pullout of Inclined Fibers from Cementitious Matrix, C. Ouyang, A. Pacios and S. P. Shah, EM Dec. 94, p2641-2659.

Random processes

Conditioned Stochastic Processes for Conditional Random Fields, Hiroyuki Kameda and Hitoshi Morikawa, EM Apr. 94, p855-875.

Orthogonal Series Expansions of Random Fields in Reliability Analysis, Jun Zhang and Bruce Ellingwood, EM Dec. 94, p2660-2677.

Probabilistic Nonlocal Damage Model for Continua with Random Field Properties, J. Carmeliet and H. Hens, EM Oct. 94, p2013-2027.

Traffic Loads on Large Bridges Modeled as White-Noise Fields, Ove Ditlevsen, EM Apr. 94, p681-694.

Random variables

Error Evaluation of Three Random-Field Generators, Gordon A. Fenton, EM Dec. 94, p2478-2497.

Point-Estimate Method for Calculating Statistical Moments, K. S. Li, EM July 92, p1506-1511.

Reliability of Uncertain Nonlinear Trusses Under Random Excitation. II, R.-H. Cherng and Y. K. Wen, EM Apr. 94, p748-757.

Reliability of Uncertain Nonlinear Trusses Under Random Excitation. I, R.-H. Cherng and Y. K. Wen, EM Apr. 94, p733-747.

Stochastic Vehicle-Queue-Load Model for Large Bridges, Ove Ditlevsen and Henrik O. Madsen, EM Sept. 94, p1829-1847.

Random vibration

Approximate Random Vibration Analysis of Classically Damped MDOF Systems, C. Papadimitriou and J. L. Beck, EM Jan. 94, p75-96.

Dynamic Behavior of Nonlinear Cable System. III, Dan M. Ghiocel and Dario A. Gasparini, EM Dec. 94, p2694-2712.

Energy Method for Nonlinear Random Vibrations in MDF Systems, Long Yun Jia, EM Apr. 94, p910-916.

Energy-Based Dynamic Analysis of Secondary Systems, Genda Chen and T. T. Soong, EM Mar. 94, p514-534.

Equivalent Linearization for Seismic Responses. I: Formulation and Error Analysis, Young J. Park, EM Nov. 92, p2207-2226.

Nonlinear Stochastic Response and Reliability of Secondary Systems, C. D. Huang, W. Q. Zhu and T. T. Soong, EM Jan. 94, p177-196.

Random Vibration of Beam under Moving Loads, Giuseppe Ricciardi, EM Nov. 94, p2361-2380.

Seismic Random-Vibration Analysis of Multisupport-Structural Systems, Ernesto Heredia-Zavoni and Erik H. Vanmarcke, EM May 94, p1107-1128.

Random waves

Distributions of Envelope and Phase in Weakly Nonlinear Random Waves, M. Aziz Tayfun, EM May 94, p1009-1025.

Volterra Models of Ocean Structures: Extreme and Fatigue Reliability, S. R. Winterstein, T. C. Ude and T. Marthinsen, EM June 94, p1369-1385.

Reinforcement

Size Effect in Fiber or Bar Pullout with Interface Softening Slip, Zdeněk P. Bažant and Rodrigue Desmorat, EM Sept. 94, p1945-1962.

Reliability

Inverse Reliability Problem, Armen Der Kiureghian, Yan Zhang and Chun-Ching Li, EM May 94, p1154-1159.

Nonlinear Stochastic Response and Reliability of Secondary Systems, C. D. Huang, W. Q. Zhu and T. T. Soong, EM Jan. 94, p177-196.

Reliability of Uncertain Nonlinear Trusses Under Random Excitation. II, R.-H. Cherng and Y. K. Wen, EM Apr. 94, p748-757.

Reliability of Uncertain Nonlinear Trusses Under Random Excitation. I, R.-H. Cherng and Y. K. Wen, EM Apr. 94, p733-747.

Sensitivity Analysis of Reliability-Based Optimal Solution, Ib Enevoldsen, EM Jan. 94, p198-205.

Variability Response Functions of Stochastic Plane Stress/Strain Problems, Friedrich J. Wall and George Deodatis, EM Sept. 94, p1963-1982.

Volterra Models of Ocean Structures: Extreme and Fatigue Reliability, S. R. Winterstein, T. C. Ude and T. Marthinsen, EM June 94, p1369-1385.

Reliability analysis

Model-Correction-Factor Method in Structural Reliability, Ove Ditlevsen and Torben Arnbjerg-Nielsen, EM Jan. 94, p1-10.

Orthogonal Series Expansions of Random Fields in Reliability Analysis, Jun Zhang and Bruce Ellingwood, EM Dec. 94, p2660-2677.

Repeated loading

Optimal Shakedown Design of Circular Plates, F. Giambanco, L. Palizzolo and C. Polizzotto, EM Dec. 94, p2535-2555.

Resonance

Dynamics of Elastic Cable Under Parametric and External Resonances, Y. Cai and S. S. Chen, EM Aug. 94, p1786-1802.

Response spectra

Fracture Energy Formulation for Inelastic Behavior of Plain Concrete, G. Etse and K. Willam, EM Sept. 94, p1983-2011.

Seismic Random-Vibration Analysis of Multisupport-Structural Systems, Ernesto Heredia-Zavoni and Erik H. Vanmarcke, EM May 94, p1107-1128.

Responses

Approximate Random Vibration Analysis of Classically Damped MDOF Systems, C. Papadimitriou and J. L. Beck, EM Jan. 94, p75-96.

Variability Response Functions of Stochastic Plane Stress/Strain Problems, Friedrich J. Wall and George Deodatis, EM Sept. 94, p1963-1982.

Restraint systems

Structural System Changes by Means of Forcedly Applied Restraints, Angelo Marcello Tarantino, EM Feb. 94, p392-399.

Rigid-body dynamics

Slender Rigid Block Motion, S. J. Hogan, EM Jan. 94, p11-24.

Rigidity

Turbulent Boundary Layer Over Flat Plate with Rigid and Flexible Surfaces, M. S. Abu Sharekh, S. K. Pathak, G. L. Asawa and P. D. Porey, EM Aug. 94, p1675-1695.

Rings

Axisymmetric Plastic Plates with Ring Supports at Optimum Locations, C. M. Wang, S. K. Ting and W. A. M. Alwis, EM Feb. 94, p400-407.

Out-of-Plane Buckling of Restrained Thin Rings of General Open Section, J. G. Teng and R. M. Lucas, EM May 94, p929-948.

Rocks

Stresses in Anisotropic Rock Mass with Irregular Topography, Ernian Pan and Bernard Amadei, EM Jan. 94, p97-119.

Rotation

hp Version of Finite-Element Mixed Method, Michelle M. Crull and P. K. Basu, EM Nov. 94, p2342-2360.

Rubber

Bending of Cord Composite Plates, Carol Kittredge Shield and George A. Costello, EM Apr. 94, p876-892.

Safety

Second-Order Upper Bounds on Probability of Intersection of Failure Events, Qiang Xiao and Sankaran Mahadevan, EM Mar. 94, p670-674.

Salinity

Characterization of Circulation and Salinity Change in Galveston Bay, Keh-Han Wang, EM Mar. 94, p557-579.

Sampling

Galerkin Sampling Method for Stochastic Mechanics Problems, P. D. Spanos and B. A. Zeldin, EM May 94, p1091-1106.

Sand

Unified Critical-State Bounding-Surface Plasticity Model for Soil, Roger S. Crouch, John P. Wolf and Yannis F. Dafalias, EM Nov. 94, p2251-2270.

Sandwich panels

Three-Dimensional Solutions for Initially Stressed Structural Sandwiches, Ahmed K. Noor, Jeanne M. Peters and W. Scott Burton, EM Feb. 94, p284-303.

Three-Dimensional Solutions for Thermomechanical Stresses in Sandwich Panels and Shells, W. Scott Burton and Ahmed K. Noor, EM Oct. 94, p2044-2071.

Sandwich structures

High-Order Bending of Sandwich Beams with Transversely Flexible Core and Nonparallel Skins, D. Peled and Y. Frostig, EM June 94, p1255-1269.

Scale effect

Scaling Laws in Mechanics of Failure, Zdeněk P. Bažant, EM Sept. 93, p1828-1844.

Scattering

Wave Scattering by Submerged Porous Disk, Allen T. Chwang and Jianhua Wu, EM Dec. 94, p2575-2587.

Secondary systems

Energy-Based Dynamic Analysis of Secondary Systems, Genda Chen and T. T. Soong, EM Mar. 94, p514-534.

First-Passage Time of Secondary System Mounted on Yielding Structure, David C. K. Chen and Loren D. Lutes, EM Apr. 94, p814-834.

Nonlinear Stochastic Response and Reliability of Secondary Systems, C. D. Huang, W. Q. Zhu and T. T. Soong, EM Jan. 94, p177-196.

Seismic design

Modal Predictive Control of Structures. I: Formulation, F. López-Almansa, R. Andrade, J. Rodellar and A. M. Reinhorn, EM Aug. 94, p1743-1760.

Modal Predictive Control of Structures. II: Implementation, F. López-Almansa, R. Andrade, J. Rodellar and A. M. Reinhorn, EM Aug. 94, p1761-1772.

Seismic response

Element-Level System Identification with Unknown Input, Duan Wang and Achintya Haldar, EM Jan. 94, p159-176.

Equivalent Linearization for Seismic Responses. I: Formulation and Error Analysis, Young J. Park, EM Nov. 92, p2207-2226.

Feasibility Study of Adaptive Control of Structures Under Seismic Excitation, R. A. Burdisso, L. E. Suarez and C. R. Fuller, EM Mar. 94, p580-592.

Seismic Random-Vibration Analysis of Multisupport-Structural Systems, Ernesto Heredia-Zavoni and Erik H. Vanmarcke, EM May 94, p1107-1128.

Simulation of Multi-Dimensional, Anisotropic Ground Motions, O. Ramadan and M. Novak, EM Aug. 94, p1773-1785.

Semi-rigid connections

Cross Bracings in Tapered Systems: Semirigid Ends, Robert Levy, Fred Segal and Avigdor Rutenberg, EM Aug. 94, p1803-1818.

Design of Imperfect Cross-Bracings, Fred Segal, Robert Levy and Avigdor Rutenberg, EM May 94, p1057-1075.

Sensitivity analysis

Sensitivity Analysis of Reliability-Based Optimal Solution, Ib Enevoldsen, EM Jan. 94, p198-205.

Three-Dimensional Solutions for Thermomechanical Stresses in Sandwich Panels and Shells, W. Scott Burton and Ahmed K. Noor, EM Oct. 94, p2044-2071.

Sensors

Experimental Study of Embedded Fiber-Optic Strain Gauges in Concrete Structures, S. F. Masri, M. S. Agbabian, A. M. Abdel-Ghaffar, M. Higazy, R. O. Claus and M. J. de Vries, EM Aug. 94, p1696-1717.

Methodology for Optimum Sensor Locations for Parameter Identification in Dynamic Systems, Firdaus E. Udwadia, EM Feb. 94, p368-390.

Shape

Vibration of Mindlin Plates on Point Supports Using Constraint Functions, K. M. Liew, Y. Xiang, S. Kitipornchai and M. K. Lim, EM Mar. 94, p499-513.

Shear

Buckling Solutions of Rectangular Mindlin Plates under Uniform Shear, C. M. Wang, Y. Xiang and S. Kitipornchai, EM Nov. 94, p2462-2470.

Shear deformation

Composite Beam Element with Layerwise Plane Sections, Youngchan Kim, Julio F. Davalos and Ever J. Barbero, EM May 94, p1160-1166.

Continuum Model for Analysis of Multiply Connected Perforated Cores, Domenico Capuani, Marco Savoia and Ferdinando Laudiero, EM Aug. 94, p1641-1660.

Stability of Skew Mindlin Plates under Isotropic In-Plane Pressure, C. M. Wang, S. Kitipornchai, Y. Xiang and K. M. Liew, EM Feb. 93, p393-401.

Shear flow

Computation of Turbulent Shear Flow Over Surface-Mounted Obstacle, Jianming He and Charles C. S. Song, EM Nov. 92, p2282-2297.

Shear stress

Size Effect in Fiber or Bar Pullout with Interface Softening Slip, Zdeněk P. Bažant and Rodrigue Desmorat, EM Sept. 94, p1945-1962.

Shear walls

Analysis of Free Vibrations of Tall Buildings, Qiusheng Li, Hong Cao and Guiqing Li, EM Sept. 94, p1861-1876.

Shell structures

Lower Bounds for Overall Buckling of Spherical Space Domes, M. Kashani and J. G. A. Croll, EM May 94, p949-970.

Nonlinear Geometric and Material Behavior of Shell Structures with Large Strains, S. A. Schimmels and A. N. Palazotto, EM Feb. 94, p320-345.

Shells

hp Version of Finite-Element Mixed Method, Michelle M. Crull and P. K. Basu, EM Nov. 94, p2342-2360.

Stress and Displacement of Thick Doubly Curved Laminated Shells, Chih-Ping Wu and Chi-Chuan Liu, EM July 94, p1403-1428.

Signals

Amplified Microbending in Coated Optical Fibres, John Roorda, EM Apr. 94, p917-921.

Simulation of Multi-Dimensional, Anisotropic Ground Motions, O. Ramadan and M. Novak, EM Aug. 94, p1773-1785.

Silos

Out-of-Plane Buckling of Restrained Thin Rings of General Open Section, J. G. Teng and R. M. Lucas, EM May 94, p929-948.

Simulation

Simulation of Multi-Dimensional, Anisotropic Ground Motions, O. Ramadan and M. Novak, EM Aug. 94, p1773-1785.

Size effect

Fractals, Fractures, and Size Effects in Concrete, Victor E. Saouma and Christopher C. Barton, EM Apr. 94, p835-854.

Penetration Fracture of Ice Plate: 2D Analysis and Size Effect, Yuan-Neng Li and Zdeněk P. Bažant, EM July 94, p1481-1498.

Penetration Fracture of Sea Ice Plate: Simplified Analysis and Size Effect, Zdeněk P. Bažant and Yuan-Neng Li, EM June 94, p1304-1321.

Scaling Laws in Mechanics of Failure, Zdeněk P. Bažant, EM Sept. 93, p1828-1844.

Size Effect in Fiber or Bar Pullout with Interface Softening Slip, Zdeněk P. Bažant and Rodrigue Desmorat, EM Sept. 94, p1945-1962.

Skewness

Bridge Buffeting by Skew Winds in Erection Stages, Robert H. Scanlan, EM Feb. 93, p251-269.

Distributions of Envelope and Phase in Weakly Nonlinear Random Waves, M. Aziz Tayfun, EM May 94, p1009-1025.

Stability of Skew Mindlin Plates under Isotropic In-Plane Pressure, C. M. Wang, S. Kitipornchai, Y. Xiang and K. M. Liew, EM Feb. 93, p393-401.

Slip

Pullout of Inclined Fibers from Cementitious Matrix, C. Ouyang, A. Pacios and S. P. Shah, EM Dec. 94, p2641-2659.

Size Effect in Fiber or Bar Pullout with Interface Softening Slip, Zdeněk P. Bažant and Rodrigue Desmorat, EM Sept. 94, p1945-1962.

Sloshing

Dynamic Response of Tank Containing Two Liquids, Yu Tang, EM Mar. 93, p531-548.

Softening
Constitutive Theory of Interface Behavior in Quasi-Brittle Materials, H. Y. Yang and Ming L. Wang, EM Dec. 94, p2588-2603.

Size Effect in Fiber or Bar Pullout with Interface Softening Slip, Zdeněk P. Bažant and Rodrigue Desmorat, EM Sept. 94, p1945-1962.

Soil analysis
Unified Critical-State Bounding-Surface Plasticity Model for Soil, Roger S. Crouch, John P. Wolf and Yannis F. Dafalias, EM Nov. 94, p2251-2270.

Soil dynamics
Axisymmetric Time-Domain Transmitting Boundaries, Andrew John Deeks and Mark Felton Randolph, EM Jan. 94, p25-42.

Soil-structure interaction
Analysis of Embedded Foundations by Substructure-Deletion Method, R. Betti and A. M. Abdel-Ghaffar, EM June 94, p1283-1303.

Dynamic Green's Functions of Homogeneous Poroelastic Half-Plane, T. Senjuntichai and R. K. N. D. Rajapakse, EM Nov. 94, p2381-2404.

Effect of Flexibility on Impedance Functions for Circular Foundation, Gin-Show Liou and Pao-Han Huang, EM July 94, p1429-1446.

Nonlinear Model for Building-Soil Systems, D. B. McCallen and K. M. Romstad, EM May 94, p1129-1152.

Solids
Mechanics of Growing Deformable Solids: A Review, Vyacheslav E. Naumov, EM Feb. 94, p207-220.

Solutions
Sensitivity Analysis of Reliability-Based Optimal Solution, Ib Enevoldsen, EM Jan. 94, p198-205.

Space frames
Lower Bounds for Overall Buckling of Spherical Space Domes, M. Kashani and J. G. A. Croll, EM May 94, p949-970.

Spatial data
Ground-Motion Spatial Variation Effects on Circular Arch Responses, Hong Hao, EM Nov. 94, p2326-2341.

Spatial distribution
Wave Attenuation in Elastic Continuum with Attenuating Neighborhood, Songtao Xue, Jun Tobita and Masanori Izumi, EM Mar. 94, p419-430.

Spectral analysis
Seismic Random-Vibration Analysis of Multisupport-Structural Systems, Ernesto Heredia-Zavoni and Erik H. Vanmarcke, EM May 94, p1107-1128.

Spectral Analysis of Fluid Flow in Oscillating Grid Reactor, Leonard W. Casson, Desmond F. Lawler and David G. Bogard, EM Feb. 94, p346-367.

Speed
Importance of Speed and Frequency in Flexible Pavement Response, M. S. A. Hardy and D. Cebon, EM Mar. 94, p463-482.

Spheres
Hollow Spheres Subjected to Sustained and Variable Loads, Wei Jiang, EM June 94, p1343-1368.

Shakedown Analysis of Hollow Spheres, Wei Jiang, EM July 94, p1447-1480.

Spherical shells
Three-Dimensional Solutions for Thermomechanical Stresses in Sandwich Panels and Shells, W. Scott Burton and Ahmed K. Noor, EM Oct. 94, p2044-2071.

Stability
Dynamic Behavior of Nonlinear Cable System. III, Dan M. Ghiocel and Dario A. Gasparini, EM Dec. 94, p2694-2712.

Local Buckling by Complex Finite Strip Method Using Bubble Functions, Mojtaba Azhari and Mark Andrew Bradford, EM Jan. 94, p43-57.

Lower Bounds for Overall Buckling of Spherical Space Domes, M. Kashani and J. G. A. Croll, EM May 94, p949-970.

Stability of Active-Tendon Structural Control with Time Delay, L. Zhang, C. Y. Yang, M. J. Chajes and A. H-D. Cheng, EM May 93, p1017-1024.

Stability Theory of Cohesive Crack Model, Yuan N. Li and Robert Y. Liang, EM Mar. 92, p587-603.

Steady-State Oscillation of Hysteretic Differential Model. II: Performance Analysis, C. W. Wong, Y. Q. Ni and J. M. Ko, EM Nov. 94, p2299-2325.

Stability analysis
Equations for Tapered Thin-Walled Beams of Generic Open Section, Sundaramoorthy Rajasekaran, EM Aug. 94, p1607-1629.

Instability of Tapered Thin-Walled Beams of Generic Section, Sundaramoorthy Rajasekaran, EM Aug. 94, p1630-1640.

Statistical analysis
Orthogonal Series Expansions of Random Fields in Reliability Analysis, Jun Zhang and Bruce Ellingwood, EM Dec. 94, p2660-2677.

Statistical data
Point-Estimate Method for Calculating Statistical Moments, K. S. Li, EM July 92, p1506-1511.

Steady flow
No-Choke Flow in Trapezoidal Channels, Subhasish Dey, EM Oct. 94, p2224-2231.

Steady state
Buckle Propagation: Steady-State Finite-Element Analysis, André C. Nogueira and John L. Tassoulas, EM Sept. 94, p1931-1944.

Shakedown Analysis of Hollow Spheres, Wei Jiang, EM July 94, p1447-1480.

Steady-State Oscillation of Hysteretic Differential Model. I: Response Analysis, C. W. Wong, Y. Q. Ni and S. L. Lau, EM Nov. 94, p2271-2298.

Steady-State Oscillation of Hysteretic Differential Model. II: Performance Analysis, C. W. Wong, Y. Q. Ni and J. M. Ko, EM Nov. 94, p2299-2325.

Steel structures

Cross Bracings in Tapered Systems: Semirigid Ends, Robert Levy, Fred Segal and Avigdor Rutenberg, EM Aug. 94, p1803-1818.

Design of Imperfect Cross-Bracings, Fred Segal, Robert Levy and Avigdor Rutenberg, EM May 94, p1057-1075.

Stiffening

Buckling of Plates with Stiffening Elastically-Restrained Edges, Raymond H. Plaut and Ardéshir Guran, EM Feb. 94, p408-411.

Postcracking Formulation for Analysis of RC Structures Based on Secant Stiffness, Ananth Ramaswamy, F. Barzegar and G. Z. Voyiadjis, EM Dec. 94, p2621-2640.

Stiffness

Single-Degree-of-Freedom Nonlinear Homogeneous Systems, José A. Inaudi, George Leitmann and James M. Kelly, EM July 94, p1543-1562.

Stochastic models

Probabilistic Nonlocal Damage Model for Continua with Random Field Properties, J. Carmeliet and H. Hens, EM Oct. 94, p2013-2027.

Stochastic Vehicle-Queue-Load Model for Large Bridges, Ove Ditlevsen and Henrik O. Madsen, EM Sept. 94, p1829-1847.

Stochastic processes

Conditioned Stochastic Processes for Conditional Random Fields, Hiroyuki Kameda and Hitoshi Morikawa, EM Apr. 94, p855-875.

First-Passage Time of Secondary System Mounted on Yielding Structure, David C. K. Chen and Loren D. Lutes, EM Apr. 94, p814-834.

Frequency Analysis in Stochastic Linearization, F. Casciati, L. Faravelli and P. Venini, EM Dec. 94, p2498-2518.

Galerkin Sampling Method for Stochastic Mechanics Problems, P. D. Spanos and B. A. Zeldin, EM May 94, p1091-1106.

Reliability of Uncertain Nonlinear Trusses Under Random Excitation. II, R.-H. Cherng and Y. K. Wen, EM Apr. 94, p748-757.

Reliability of Uncertain Nonlinear Trusses Under Random Excitation. I, R.-H. Cherng and Y. K. Wen, EM Apr. 94, p733-747.

Variability Response Functions of Stochastic Plane Stress/Strain Problems, Friedrich J. Wall and George Deodatis, EM Sept. 94, p1963-1982.

Storage tanks

Dynamic Response of Tank Containing Two Liquids, Yu Tang, EM Mar. 93, p531-548.

Strain

Mechanics of Growing Deformable Solids: A Review, Vyacheslav E. Naumov, EM Feb. 94, p207-220.

Strain gages

Experimental Study of Embedded Fiber-Optic Strain Gauges in Concrete Structures, S. F. Masri, M. S. Agbabian, A. M. Abdel-Ghaffar, M. Higazy, R. O. Claus and M. J. de Vries, EM Aug. 94, p1696-1717.

Strain hardening

Anisotropic Plasticity Model for Foams and Honeycombs, H. L. Schreyer, Q. H. Zuo and A. K. Maji, EM Sept. 94, p1913-1930.

Strain rate

Anisotropic Plasticity Model for Foams and Honeycombs, H. L. Schreyer, Q. H. Zuo and A. K. Maji, EM Sept. 94, p1913-1930.

Strain softening

Discretization Influence on Regularization by Two Localization Limiters, Antonio Huerta and Gilles Pijaudier-Cabot, EM June 94, p1198-1218.

Strength

Edge Strength of Window Glass by Mechanical Test, Chris P. Pantelides, Gregory P. Sallee and Joseph E. Minor, EM May 94, p1076-1090.

Stress

Nonlocal Damage Theory Based on Micromechanics of Crack Interactions, Zdeněk P. Bažant, EM Mar. 94, p593-617.

Postcracking Formulation for Analysis of RC Structures Based on Secant Stiffness, Ananth Ramaswamy, F. Barzegar and G. Z. Voyiadjis, EM Dec. 94, p2621-2640.

Stresses in Anisotropic Rock Mass with Irregular Topography, Ernian Pan and Bernard Amadei, EM Jan. 94, p97-119.

Stress analysis

Stress and Displacement of Thick Doubly Curved Laminated Shells, Chih-Ping Wu and Chi-Chuan Liu, EM July 94, p1403-1428.

Stress concentration

High-Order Bending of Sandwich Beams with Transversely Flexible Core and Nonparallel Skins, D. Peled and Y. Frostig, EM June 94, p1255-1269.

Stress intensity factor

Dynamic Stress Intensity Factor for Subsurface Inclined Cracks, Chien-Ching Ma and Szu-Kuzi Chen, EM Mar. 94, p483-498.

Stress relaxation

Structural System Changes by Means of Forcedly Applied Restraints, Angelo Marcello Tarantino, EM Feb. 94, p392-399.

Stress strain relations

Nonlinear Geometric and Material Behavior of Shell Structures with Large Strains, S. A. Schimmels and A. N. Palazotto, EM Feb. 94, p320-345.

Stress strain relations, soils

Procedures for Elastoplastic Liquefaction Modeling of Sands, A. Anandarajah, EM July 94, p1563-1587.

Stress waves

Dynamic Stress Intensity Factor for Subsurface Inclined Cracks, Chien-Ching Ma and Szu-Kuzi Chen, EM Mar. 94, p483-498.

Structural analysis

Application of Neural Networks in Vibrational Signature Analysis, M. F. Elkordy, K. C. Chang and G. C. Lee, EM Feb. 94, p250-265.

Identification and Uncertainty Estimation of Structural Parameters, C. G. Koh and L. M. See, EM June 94, p1219-1236.

Simple Semi-Loof Element for Analyzing Folded-Plate Structures, K. Y. Sze, EM Jan. 94, p120-134.

Structural System Changes by Means of Forcedly Applied Restraints, Angelo Marcello Tarantino, EM Feb. 94, p392-399.

Structural behavior

Study of Two-Surface Plasticity Theory, Wei Jiang, EM Oct. 94, p2179-2200.

Structural control

Feasibility Study of Adaptive Control of Structures Under Seismic Excitation, R. A. Burdisso, L. E. Suarez and C. R. Fuller, EM Mar. 94, p580-592.

Frequency Domain Optimal Control Strategies for Aseismic Protection, B. F. Spencer, Jr., J. Suhardjo and M. K. Sain, EM Jan. 94, p135-158.

Modal Predictive Control of Structures. I: Formulation, F. López-Almansa, R. Andrade, J. Rodellar and A. M. Reinhorn, EM Aug. 94, p1743-1760.

Modal Predictive Control of Structures. II: Implementation, F. López-Almansa, R. Andrade, J. Rodellar and A. M. Reinhorn, EM Aug. 94, p1761-1772.

Optimal Configuration of Active-Control Mechanisms, Mohamed Abdel-Mooty and John Roorda, EM Mar. 94, p535-556.

Structural design

Dynamic Modal Responses of Wave-Excited Offshore Structures, G. D. Hahn and J. R. Sanghvi, EM Apr. 94, p893-908.

Structural dynamics

Bridge Buffeting by Skew Winds in Erection Stages, Robert H. Scanlan, EM Feb. 93, p251-269.

Modal Predictive Control of Structures. I: Formulation, F. López-Almansa, R. Andrade, J. Rodellar and A. M. Reinhorn, EM Aug. 94, p1743-1760.

Modal Predictive Control of Structures. II: Implementation, F. López-Almansa, R. Andrade, J. Rodellar and A. M. Reinhorn, EM Aug. 94, p1761-1772.

Optimal Configuration of Active-Control Mechanisms, Mohamed Abdel-Mooty and John Roorda, EM Mar. 94, p535-556.

Optimal Design of Base-Isolated Structures with Dynamic Absorbers, S. C. Sinha and Guangning Li, EM Feb. 94, p221-231.

Structural reliability

Hyperspace Division Method for Structural Reliability, Satoshi Katsuki and Dan M. Frangopol, EM Nov. 94, p2405-2427.

Model-Correction-Factor Method in Structural Reliability, Ove Ditlevsen and Torben Arnbjerg-Nielsen, EM Jan. 94, p1-10.

Orthogonal Series Expansions of Random Fields in Reliability Analysis, Jun Zhang and Bruce Ellingwood, EM Dec. 94, p2660-2677.

Reexamination of Convex Polyhedron Outcrossing Problem, Ove Ditlevsen, EM Mar. 94, p654-660.

Second-Order Upper Bounds on Probability of Intersection of Failure Events, Qiang Xiao and Sankaran Mahadevan, EM Mar. 94, p670-674.

Structural response

Ground-Motion Spatial Variation Effects on Circular Arch Responses, Hong Hao, EM Nov. 94, p2326-2341.

Lateral Cyclic Response of Pile in ViscoElastic Winkler Subgrade, Shintaro Yao and Toyoaki Nogami, EM Apr. 94, p758-775.

Reliability of Uncertain Nonlinear Trusses Under Random Excitation. II, R.-H. Cherng and Y. K. Wen, EM Apr. 94, p748-757.

Reliability of Uncertain Nonlinear Trusses Under Random Excitation. I, R.-H. Cherng and Y. K. Wen, EM Apr. 94, p733-747.

Structural stability

Buckling of Plates with Stiffening Elastically-Restrained Edges, Raymond H. Plaut and Ardéshir Guran, EM Feb. 94, p408-411.

Stability of Masonry Piers and Arches Including Sliding, Thomas E. Boothby, EM Feb. 94, p304-319.

Structures

Control of Hysteretic System Using Velocity and Acceleration Feedbacks, J. N. Yang, Z. Li and S. C. Liu, EM Nov. 92, p2227-2245.

Methodology for Optimum Sensor Locations for Parameter Identification in Dynamic Systems, Firdaus E. Udwadia, EM Feb. 94, p368-390.

Subgrades

Lateral Cyclic Response of Pile in ViscoElastic Winkler Subgrade, Shintaro Yao and Toyoaki Nogami, EM Apr. 94, p758-775.

Substructures

Analysis of Embedded Foundations by Substructure-Deletion Method, R. Betti and A. M. Abdel-Ghaffar, EM June 94, p1283-1303.

Effect of Flexibility on Impedance Functions for Circular Foundation, Gin-Show Liou and Pao-Han Huang, EM July 94, p1429-1446.

Supports

Axisymmetric Plastic Plates with Ring Supports at Optimum Locations, C. M. Wang, S. K. Ting and W. A. M. Alwis, EM Feb. 94, p400-407.

Free-Vibration Analysis of Point-Supported Orthotropic Plates, D. J. Gorman, EM Jan. 94, p58-74.

Vibration of Mindlin Plates on Point Supports Using Constraint Functions, K. M. Liew, Y. Xiang, S. Kitipornchai and M. K. Lim, EM Mar. 94, p499-513.

System analysis

Element-Level System Identification with Unknown Input, Duan Wang and Achintya Haldar, EM Jan. 94, p159-176.

System reliability

Hyperspace Division Method for Structural Reliability, Satoshi Katsuki and Dan M. Frangopol, EM Nov. 94, p2405-2427.

Systems engineering

Second-Order Upper Bounds on Probability of Intersection of Failure Events, Qiang Xiao and Sankaran Mahadevan, EM Mar. 94, p670-674.

Tall buildings

Analysis of Free Vibrations of Tall Buildings, Qiusheng Li, Hong Cao and Guiqing Li, EM Sept. 94, p1861-1876.

Tanks

Free-Vibration Analysis of Tank Containing Two Liquids, Yu Tang, EM Mar. 94, p618-636.

Taper

Equations for Tapered Thin-Walled Beams of Generic Open Section, Sundaramoorthy Rajasekaran, EM Aug. 94, p1607-1629.

Instability of Tapered Thin-Walled Beams of Generic Section, Sundaramoorthy Rajasekaran, EM Aug. 94, p1630-1640.

Temperature effects

Shakedown Analysis of Hollow Spheres, Wei Jiang, EM July 94, p1447-1480.

Tensile loading

Material Model for Concrete in Cracked and Uncracked States, R. Meyer, H. Ahrens and H. Duddeck, EM Sept. 94, p1877-1895.

Tension

Postcracking Formulation for Analysis of RC Structures Based on Secant Stiffness, Ananth Ramaswamy, F. Barzegar and G. Z. Voyiadjis, EM Dec. 94, p2621-2640.

Tension leg platforms

Volterra Models of Ocean Structures: Extreme and Fatigue Reliability, S. R. Winterstein, T. C. Ude and T. Marthinsen, EM June 94, p1369-1385.

Thermal properties

Postbuckling of Moderately Thick Circular Plates With Edge Elastic Restraint, G. Venkateswara Rao, N. Rajasekhara Naidu and K. Kanaka Raju, EM Oct. 94, p2232-2238.

Thermal stresses

Edge Strength of Window Glass by Mechanical Test, Chris P. Pantelides, Gregory P. Sallee and Joseph E. Minor, EM May 94, p1076-1090.

Finite-Element Modeling of Deformation and Cracking in Early-Age Concrete, René de Borst and A. H. van den Boogaard, EM Dec. 94, p2519-2534.

Three-Dimensional Solutions for Initially Stressed Structural Sandwiches, Ahmed K. Noor, Jeanne M. Peters and W. Scott Burton, EM Feb. 94, p284-303.

Three-Dimensional Solutions for Thermomechanical Stresses in Sandwich Panels and Shells, W. Scott Burton and Ahmed K. Noor, EM Oct. 94, p2044-2071.

Thickness

Stability of Skew Mindlin Plates under Isotropic In-Plane Pressure, C. M. Wang, S. Kitipornchai, Y. Xiang and K. M. Liew, EM Feb. 93, p393-401.

Thin wall structures

Comparison of Simple and Chebychev Polynomials in Rayleigh-Ritz Analysis, Sarvesh Singhvi and Rakesh K. Kapania, EM Oct. 94, p2126-2135.

Continuum Model for Analysis of Multiply Connected Perforated Cores, Domenico Capuani, Marco Savoia and Ferdinando Laudiero, EM Aug. 94, p1641-1660.

Equations for Tapered Thin-Walled Beams of Generic Open Section, Sundaramoorthy Rajasekaran, EM Aug. 94, p1607-1629.

Instability of Tapered Thin-Walled Beams of Generic Section, Sundaramoorthy Rajasekaran, EM Aug. 94, p1630-1640.

Out-of-Plane Buckling of Restrained Thin Rings of General Open Section, J. G. Teng and R. M. Lucas, EM May 94, p929-948.

Three-dimensional analysis

Three-Dimensional Solutions for Initially Stressed Structural Sandwiches, Ahmed K. Noor, Jeanne M. Peters and W. Scott Burton, EM Feb. 94, p284-303.

Three-Dimensional Solutions for Thermomechanical Stresses in Sandwich Panels and Shells, W. Scott Burton and Ahmed K. Noor, EM Oct. 94, p2044-2071.

Three-dimensional models

Anisotropic Plasticity Model for Foams and Honeycombs, H. L. Schreyer, Q. H. Zuo and A. K. Maji, EM Sept. 94, p1913-1930.

Composite 2D/3D Hydroelastic-Analysis Method for Floating Structures, Xiling Che, H. Ronald Riggs and R. Cengiz Ertekin, EM July 94, p1499-1520.

Time dependence

Computation of Turbulent Shear Flow Over Surface-Mounted Obstacle, Jianming He and Charles C. S. Song, EM Nov. 92, p2282-2297.

Reexamination of Convex Polyhedron Outcrossing Problem, Ove Ditlevsen, EM Mar. 94, p654-660.

Time factors

Stability of Active-Tendon Structural Control with Time Delay, L. Zhang, C. Y. Yang, M. J. Chajes and A. H-D. Cheng, EM May 93, p1017-1024.

Topography

Stresses in Anisotropic Rock Mass with Irregular Topography, Ernian Pan and Bernard Amadei, EM Jan. 94, p97-119.

Toughness
Fractals, Fractures, and Size Effects in Concrete, Victor E. Saouma and Christopher C. Barton, EM Apr. 94, p835-854.

Traffic
Stochastic Vehicle-Queue-Load Model for Large Bridges, Ove Ditlevsen and Henrik O. Madsen, EM Sept. 94, p1829-1847.

Traffic Loads on Large Bridges Modeled as White-Noise Fields, Ove Ditlevsen, EM Apr. 94, p681-694.

Traffic flow
Random Vibration of Beam under Moving Loads, Giuseppe Ricciardi, EM Nov. 94, p2361-2380.

Transition points
High-Order Bending of Sandwich Beams with Transversely Flexible Core and Nonparallel Skins, D. Peled and Y. Frostig, EM June 94, p1255-1269.

No-Choke Flow in Trapezoidal Channels, Subhasish Dey, EM Oct. 94, p2224-2231.

Transport phenomena
Characterization of Circulation and Salinity Change in Galveston Bay, Keh-Han Wang, EM Mar. 94, p557-579.

Trapezoidal channels
No-Choke Flow in Trapezoidal Channels, Subhasish Dey, EM Oct. 94, p2224-2231.

Triaxial loads
Fracture Energy Formulation for Inelastic Behavior of Plain Concrete, G. Etse and K. Willam, EM Sept. 94, p1983-2011.

Trusses
Reliability of Uncertain Nonlinear Trusses Under Random Excitation. II, R.-H. Cherng and Y. K. Wen, EM Apr. 94, p748-757.

Reliability of Uncertain Nonlinear Trusses Under Random Excitation. I, R.-H. Cherng and Y. K. Wen, EM Apr. 94, p733-747.

Tubes
New Kinematic Hardening Model, Wei Jiang, EM Oct. 94, p2201-2222.

Study of Two-Surface Plasticity Theory, Wei Jiang, EM Oct. 94, p2179-2200.

Tunnels
Three-Dimensional Dynamic Response of Twin Cavities due to Traveling Loads, F. Guan and I. D. Moore, EM Mar. 94, p637-651.

Turbulence
Modified Eddy Viscosity Model in Fully Developed Asymmetric Channel Flows, Whey-Fone Tsai and Robert Ettema, EM Apr. 94, p720-732.

Turbulent boundary layers
Turbulent Boundary Layer Over Flat Plate with Rigid and Flexible Surfaces, M. S. Abu Sharekh, S. K. Pathak, G. L. Asawa and P. D. Porey, EM Aug. 94, p1675-1695.

Turbulent flow
Computation of Turbulent Shear Flow Over Surface-Mounted Obstacle, Jianming He and Charles C. S. Song, EM Nov. 92, p2282-2297.

Two-dimensional
Computation of Turbulent Shear Flow Over Surface-Mounted Obstacle, Jianming He and Charles C. S. Song, EM Nov. 92, p2282-2297.

Two-dimensional models
Composite 2D/3D Hydroelastic-Analysis Method for Floating Structures, Xiling Che, H. Ronald Riggs and R. Cengiz Ertekin, EM July 94, p1499-1520.

Uncertainty analysis
Dynamic Modal Responses of Wave-Excited Offshore Structures, G. D. Hahn and J. R. Sanghvi, EM Apr. 94, p893-908.

Identification and Uncertainty Estimation of Structural Parameters, C. G. Koh and L. M. See, EM June 94, p1219-1236.

Underwater structures
Water Waves Above Submerged Porous Plate, Xiping Yu and Allen T. Chwang, EM June 94, p1270-1282.

Wave Scattering by Submerged Porous Disk, Allen T. Chwang and Jianhua Wu, EM Dec. 94, p2575-2587.

Uplift
Nonlinear Model for Building-Soil Systems, D. B. McCallen and K. M. Romstad, EM May 94, p1129-1152.

Variability
Fatigue Lifetime with Load Uncertainty Represented by Convex Model, Yakov Ben-Haim, EM Mar. 94, p445-462.

Hollow Spheres Subjected to Sustained and Variable Loads, Wei Jiang, EM June 94, p1343-1368.

Single-Degree-of-Freedom Nonlinear Homogeneous Systems, José A. Inaudi, George Leitmann and James M. Kelly, EM July 94, p1543-1562.

Variability Response Functions of Stochastic Plane Stress/Strain Problems, Friedrich J. Wall and George Deodatis, EM Sept. 94, p1963-1982.

Vector analysis
Reexamination of Convex Polyhedron Outcrossing Problem, Ove Ditlevsen, EM Mar. 94, p654-660.

Vehicular traffic
Three-Dimensional Dynamic Response of Twin Cavities due to Traveling Loads, F. Guan and I. D. Moore, EM Mar. 94, p637-651.

Vibration
Analysis of Free Vibrations of Tall Buildings, Qiusheng Li, Hong Cao and Guiqing Li, EM Sept. 94, p1861-1876.

Comparison of Simple and Chebychev Polynomials in Rayleigh-Ritz Analysis, Sarvesh Singhvi and Rakesh K. Kapania, EM Oct. 94, p2126-2135.

Effect of Initial Curvature on Natural Frequency of Thin Plate on Hinge Supports, Qiulin Yu, Naser Mostaghel and Kuan-Chen Fu, EM Apr. 94, p796-813.

First-Passage Time of Secondary System Mounted on Yielding Structure, David C. K. Chen and Loren D. Lutes, EM Apr. 94, p814-834.

Free Vibrations of Laminated Anisotropic Cylindrical Shells, P. R. Heyliger and A. Jilani, EM May 93, p1062-1077.

Free-Vibration Analysis of Point-Supported Orthotropic Plates, D. J. Gorman, EM Jan. 94, p58-74.

Simulation of Multi-Dimensional, Anisotropic Ground Motions, O. Ramadan and M. Novak, EM Aug. 94, p1773-1785.

Three-Dimensional Dynamic Response of Twin Cavities due to Traveling Loads, F. Guan and I. D. Moore, EM Mar. 94, p637-651.

Three-Dimensional Solutions for Initially Stressed Structural Sandwiches, Ahmed K. Noor, Jeanne M. Peters and W. Scott Burton, EM Feb. 94, p284-303.

Vibration of Mindlin Plates on Point Supports Using Constraint Functions, K. M. Liew, Y. Xiang, S. Kitipornchai and M. K. Lim, EM Mar. 94, p499-513.

Vibration analysis

Analysis of Free Vibrations of Tall Buildings, Qiusheng Li, Hong Cao and Guiqing Li, EM Sept. 94, p1861-1876.

Application of Neural Networks in Vibrational Signature Analysis, M. F. Elkordy, K. C. Chang and G. C. Lee, EM Feb. 94, p250-265.

Equations for Tapered Thin-Walled Beams of Generic Open Section, Sundaramoorthy Rajasekaran, EM Aug. 94, p1607-1629.

Free-Vibration Analysis of Tank Containing Two Liquids, Yu Tang, EM Mar. 94, p618-636.

Viscoelasticity

Lateral Cyclic Response of Pile in ViscoElastic Winkler Subgrade, Shintaro Yao and Toyoaki Nogami, EM Apr. 94, p758-775.

Structural System Changes by Means of Forcedly Applied Restraints, Angelo Marcello Tarantino, EM Feb. 94, p392-399.

Water waves

Distributions of Envelope and Phase in Weakly Nonlinear Random Waves, M. Aziz Tayfun, EM May 94, p1009-1025.

Water Waves Above Submerged Porous Plate, Xiping Yu and Allen T. Chwang, EM June 94, p1270-1282.

Wave Motion Through Porous Structures, Xiping Yu and Allen T. Chwang, EM May 94, p989-1008.

Wave Scattering by Submerged Porous Disk, Allen T. Chwang and Jianhua Wu, EM Dec. 94, p2575-2587.

Wave attenuation

Wave Attenuation in Elastic Continuum with Attenuating Neighborhood, Songtao Xue, Jun Tobita and Masanori Izumi, EM Mar. 94, p419-430.

Wave dispersion

Axisymmetric Time-Domain Transmitting Boundaries, Andrew John Deeks and Mark Felton Randolph, EM Jan. 94, p25-42.

Wave forces

Dynamic Modal Responses of Wave-Excited Offshore Structures, G. D. Hahn and J. R. Sanghvi, EM Apr. 94, p893-908.

Wave propagation

Analytical Solutions for Harmonic Wave Propagation in Poroelastic Media, Chris Zimmerman and M. Stern, EM Oct. 94, p2154-2178.

Discretization Influence on Regularization by Two Localization Limiters, Antonio Huerta and Gilles Pijaudier-Cabot, EM June 94, p1198-1218.

Dynamic Green's Functions of Homogeneous Poroelastic Half-Plane, T. Senjuntichai and R. K. N. D. Rajapakse, EM Nov. 94, p2381-2404.

Weight

Poisson Effect in Extensive Cables with Both Ends Fixed, John V. Huddleston and Hee-Jung Ham, EM July 94, p1590-1595.

Weighting functions

Variability Response Functions of Stochastic Plane Stress/Strain Problems, Friedrich J. Wall and George Deodatis, EM Sept. 94, p1963-1982.

White noise

Nonlinear Stochastic Response and Reliability of Secondary Systems, C. D. Huang, W. Q. Zhu and T. T. Soong, EM Jan. 94, p177-196.

Stochastic Vehicle-Queue-Load Model for Large Bridges, Ove Ditlevsen and Henrik O. Madsen, EM Sept. 94, p1829-1847.

Traffic Loads on Large Bridges Modeled as White-Noise Fields, Ove Ditlevsen, EM Apr. 94, p681-694.

Wind

Bridge Buffeting by Skew Winds in Erection Stages, Robert H. Scanlan, EM Feb. 93, p251-269.

Wind forces

Identification of Aeroelastic Parameters of Flexible Bridges, Partha P. Sarkar, Nicholas P. Jones and Robert H. Scanlan, EM Aug. 94, p1718-1742.

Wind tunnel test
